Total all cities for week	\$1,187,216,495	\$1,255,629,449	-5.4			

The full details of clearings for the week covered by the above statement will be given next Saturday. We cannot, of course, furnish them to-day, bank clearings being made up by the various clearing houses at noon on Saturday, and hence in the above the last twenty-four hours of the week have to be in all cases estimated, as we go to press Friday night. Below are our usual detailed figures for the previous week, that is covering the returns for the period ending with Saturday noon October 17, with the comparative totals in 1890.

In the aggregate for the week under review there is an in crease in the whole country of nearly four and a-half millions of dollars, there being a decrease at New York of fifteen and a-half millions and a gain at all other cities of twenty millions.

Speculation in share properties on the New York Stock Exchange was less active than in the previous week.

Contrasted with the corresponding period a year ago the falling off at New York reaches 10.9 per cent, but in the total for the remaining cities the decline is only 2.8 per cent. The cities showing the heaviest ratio of gain are Grand Rapids, 33.4 per cent; Houston, 36.5; Memphis, 35.6, and Los Angeles, 22.8 per cent. There are a number of points at which the losses are important, notably Dallas, 45.6 per cent; Chattanooga, 37.3; Fort Worth, 32.2; Lincoln, 28.6; Wichita, 24.6; and Milwaukee, 21.4 per cent.

The First Number of our

STATE AND

SUPPLEMENT

Will be issued next Saturday morning, October 31, 1891.

See colored leaf opposite the previous page for the announcement of SUPPLEMENT.

THE FINANCIAL SITUATION.

The general features of the markets noted during recent weeks have remained unchanged this week, except that the tone at the Stock Exchange has improved somewhat. So far as this improved tone is accompanied by an advance in prices, the advance has been confined, as has invariably been the case of late, to the more substantial properties, those which afford the strongest evidence of an enhanced investment value. On the other hand, general business recovers but slowly. Still, there are evidences of growing financial strength and vigor among many classes. Merchants for instance report collections much better and quite prompt, and as the crops continue to be rapidly marketed the consuming capacity of producers cannot fail to develop correspondingly. It should not be overlooked that corn, which is the staple product of a very large section and what we may call the surplus crop because the last crop of a larger section, is not ready for market until about the first of January. Until that staple comes in, the farmer, in most cases, has not got the means to make free purchases. Does not this account in good part for the fact that general business improves but slowly. And does it not account also for the further fact that though a large consumption of products is no doubt in progress, prices of almost all manufactured articles continue low and the margin of profit continues very narrow. The truth is, notwithstanding the country is obviously recuperating, health restoration is always a slow and disappointing process, and is especially slow when the subject is the commerce of a country which is basing its hopes of revival upon crops scarcely harvested as yet, and when, apparently, a main element involved in the depression which has existed is a false and weakened currency.

Money has made further progress towards easier conditions. This is the natural outcome of the enlarged reserves of our associated banks and the expectation of further additions through gold imports. According to last Saturday's return the Clearing House institutions held \$112,314,600 reserve against \$100,530,200 a year ago, and a surplus of \$9,029,700 against a deficit of \$349,-225 at the same date in 1890. That for the time being affords a very promising outlook, and with the additional increase which the report to be made public to-day will show encourages the belief prevails that reserves are to be ample the remainder of the year. Gold to the amount of \$2,050,000 arrived on Monday, \$750,000 arrived on Tuesday and \$250,000 on Thursday, making \$3,050,000 for the past week. In the same period our banks gained \$2,200,000 on account of Treasury disbursements in excess of receir. These two sources of new supply consequently i are a total currency inflow of \$5,250,000; and as the laterior movement West, South, &c., shows a smaller net outflow than last week, the statement to be made public by the banks to-day must, Bros. advanced both long and short half a cent and the

as remarked above, record a further increase in their gross reserve holdings.

Call money, as represented by bankers' balances. loaned at 5 and at 3 per cent during the week, but the average was not above 31; renewals were made at 4 per cent early in the week but fell off to 31 by the close. Banks and trust companies quote 4 per cent as the minimum Time money has been in active request, and a large business has been done. Borrowers who would not pay 6 per cent and who have been resorting to the call loan branch of the market. finding lenders more liberally disposed as to rates and also as to security, have made contracts at the ruling figures of 4 to 41 per cent for thirty to sixty days and 5 to 51 for four to six months. There are no quotations for contracts maturing in January. For commercial paper the demand is good, and the city banks and institutions are now the largest buyers, while the inquiry from the interior is light. There is not a very good supply of really first-class names offering, and lower grade notes cannot be readily negotiated. Rates are 54 per cent for sixty to ninety day endorsed bills receivable, 5\(\frac{3}{4}\) to 6\(\frac{1}{4}\) for four months commission house names, and 6 to 61 for good single names having from four to six months to run.

The European markets have been without special feature this week. The new Russian loan, according to the reports made public, was well distributed among small subscribers and is understood to have been chiefly taken in France. Toward the close of the week exchange at Paris on London fell to 25fr. 25dc., indicating a movement of gold to Paris from London. The Bank of England, however, made no change in the discount rate, and not only that, but it lowered the selling price for American Eagles to 76 shillings 8 pence per ounce. The cable reports discounts of sixty to ninety day bank bills in London 28 per cent. The open market rate at Paris is 25, at Berlin it is 31 and at Frankfort 31 per cent. The Bank of England lost £384,000 bullion during the week. This, as we are advised by special cable to us, was due to an export of £425,000 (of which £200,000 was for the United States, £185,000 for Russia and £40,000 other), to the shipment of £67,000 to the interior of Great Britain and the import of £108,000 from Australia and Portugal.

Foreign exchange was easy early in the week, when there were liberal offerings of commercial bills drawn against cotton; but these seemed to be quickly absorbed and then came a good demand for long sterling, caused by easier discounts in London, which encouraged buying of this class of bills in preference to sight, and as commercial drafts were scarce the market grew firmer toward the close for sixty-day bills, while sight drafts and cable transfers were steady. Francs were affected on Thursday by the fall of exchange at Paris on London and they closed firm. Some sterling loans have matured this week and been paid off, and this tended to increase the demand. The arbitrage trading was comparatively large, but stocks bought early in the week appear to have been sold toward the close and therefore these operations have made little or no impression. The opening rates on Monday were 4 81 to $4.81\frac{1}{2}$ for sixty day and $4.84\frac{1}{2}$ to 4.85 for sight, but Brown Bros. reduced the latter on that day to 4 84 and the Bank of British North America to 4 841. There was no further change until Wednesday, when Baring, Magoun & Co. reduced the short rate to 4 84, but on the following day they restored it to 4 841, while Brown

rn he Bank of Montreal moved the sixty-day rate up to 4 82. Yesterday Baring, Magoun & Co. and the Bank of British North America advanced long to 4 82 and short to 4 85, and the market closed steady at 4 81½@4 82 for sixty-day and 4 84½@4 85 for short. Rates for actual business were 4 81 to 4 81¼ for long, 4 83¾ to 4 84 for short, 4 84¼ to 4 84½ for cable transfers, 4 80 to 4 80¼ for prime and 4 79½ to 4 79¾ for documentary commercial bills.

Accounts in regard to the condition of the anthracite coal trade continue very favorable, and what is still better the statistics in regard to the trade are also very encouraging. Mr. John H. Jones, the Chief of the Bureau of Anthracite Coal Statistics, has this week issued his statement for the month of September, and it shows on the whole a very satisfactory state of things. There was a further reduction during the month in the stocks of coal held at tidewater shipping points, and these stocks have now got down to 568,833 tons, against 703,634 tons only two months before. They are also much lower than at the corresponding period of either of the two years preceding, the present total of 568,833 tons comparing with 676,318 tons October 1, 1890, and with 877,237 tons October 1, 1889. This reduction has occurred moreover notwithstanding the companies mined a great deal more coal than they had agreed among themselves to mine. After having in the month preceding very closely lived up to the restriction policy to which they had pledged themselves, they seem in September to have resumed the old practice of disregarding their agreements to The output for the month had been fixed at 3,000,600 tons; the actual production, according to Mr. Jones's statement, was 3,333,404 tons, an apparent excess of a third of a million tons. There appears to be some question whether in fixing the output the companies intend to include the production of the outside companies not members of the combination, in which event the difference between the agreed and the actual production would not be so great as it appears to be. But during August, when the output was also fixed at 3,000,000 tons, actual production went only 146,435 tons over the amount, and the fact that for September the excess was 333,404 tons shows that whether the monthly output is supposed to embrace the outside companies or not, the correspondence between the agreed and the actual output was much less close in September than in August.

However, though the amount of coal mined was more than had been agreed upon, it was not quite as large as the production for the same month of last year. That is, while in September 1891 the production was 3,333,404 tons, in September 1890 it was nearly a hundred thousand tons larger, or 3,428,078 tons. It likewise appears (after allowing for the changes in tidewater stocks in the two years), that the amount of coal disposed of by the companies, or apparently gone into consumption, was also less than in 1890. But that is not strange, since for the year to date the production by previous statements had been shown to be greatly in excess of the corresponding period in 1890. The following table furnishes the figures on this point.

Anthracite Coal.	September.			January 1 to September 30.		
- Coat.	1891.	1890.	1889.	1891.	1890,	1889.
Stock beginning of period Production	Tons, 648,900 3,333,404		Tone. 795,749 3,186,882	Tons. 535,652 28,236,273		
Total supply St'k end of period	3,982,304 588,833		3,982,631 877,237	28,771,925 568,838		
Disposed of	3,413,471	3,512,571	3,105,394	28,203,092	25,745,551	25,362,209

It will be seen that the companies apparently disposed of 3,413,471 tons in September 1891 against 3,512,571 tons in September 1890 and 3,105,394 tons in September 1889. For the nine months, however, the consumption for 1891 is nearly 2½ million tons heavier than for 1890, and almost 3 million tons heavier than for 1889—that is, 28,203,092 tons were disposed of in 1891, against only 25,745,551 tons in 1890 and 25,362,209 tons in 1889. We have stated above that the production for September was less than a year ago, but that does not apply to the Schuylkill region, whence comes the Reading coal. In that region there was an increase of 6,685 tons, whereas in the Wyoming region there was a decrease of 47,378 tons, and in the Lehigh region a decrease of 53,980 tons. For the nine months of the year, with an increase of 2,840,510 tons in aggregate production, the Lehigh region shows a falling off of 112,960 tons; the Schuylkill region gained 1,085,103 tons and the Wyoming region 1,868,367 tons, the latter including some new producers like the New York Ontario & Western.

Very few returns of net earnings for the month of September have yet been received, it being rather early for them, but those that have come in are satisfactory as a rule. The Baltimore & Ohio shows a gain as compared with the same month last year of \$92,388 in gross earnings and of \$35,122 in net earnings on the Eastern system, but there was a slight decrease in gross earnings on the Western lines, accompanied by a heavy augmentation in expenses, so the net of the combined system falls \$20,131 below the amount of a year ago. September ends the company's fiscal year, and for the twelve months the gross shows \$98,702 increase and the net \$5,983 increase as compared with the twelve months preceding-a result very much better than was supposed possible at the beginning of the year, in view of the short crops of 1890, the reaction in general business and other unfavorable circumstances. The Pittsburg Youngstown & Ashtabula, one of the Pennsylvania lines, shows for September an increase of \$29,394 in gross earnings and of \$14,-754 in net earnings, indicating that the traffic in coal and iron ore is comparing well with a year ago. The Pittsburg Cincinnati Chicago & St. Louis, another Pennsylvania road, reports a decrease of \$45,788 in gross receipts, accompanied by a saving of \$65,816 in expenses, leaving an increase in net earnings of \$20,-027. The Richmond & Danville has increased its net from \$449,554 to \$471,277, the Kansas City Fort Scott & Memphis from \$130,274 to \$151,470, and the New York Susquehanna & Western from \$63,694 to \$71,298. The West Virginia Central & Pittsburg reports \$1,822 increase in gross and \$305 increase in net. For the month of August the Columbus Hocking Valley & Toledo has increased gross earnings from \$286,-549 to \$332,134, and net earnings from \$115,284 to \$171,612. We have been favored with a statement of the net earnings for July and August of the Cincinnati Wabash & Michigan, which is owned by the Cleveland Cincinnati Chicago & St. Louis, but whose accounts are kept separate. It appears that this road is earning a considerable surplus over and above the charges for interest, the surplus for July being \$15,273, and for August \$13,442. The Peoria & Eastern also forms part of the "Big Four" system; it shows for August a surplus above charges of \$26,806, against a deficiency below charges in the corresponding month of 1890 of \$23,190, an improvement therefore for this one month of about \$50,000.

The tendency of prices on the Stock Exchange appears again to be upward. Quotations have been hardening all through the week, and there has also been an increase in the volume of transactions, though of course business has been on a much smaller scale than during the period of exceptional activity a few weeks ago. A great deal of discrimination is being used in making purchases, which of course is a favorable feature; this week the leaders in activity and strength have been New York Central and the other Vanderbilt properties, the first mentioned having reached a higher figure than for many years past-the Another favorable feature highest since 1886. has been an increase in the demand for bonds, which previously had been lacking. No change has occurred in the general outlook. Further shipments of gold from the other side have been announced, and apprehensions of stringent money appear to have been removed. Our industries continue in rather a quiet state, but are in sound condition. There has been some European buying of our stocks and bonds, but the movement has apparently been fitful, London changing its attitude very frequently, one day sending large buying orders and the next equally large selling orders.

The following statement, made up from returns collected by us, shows the week's receipts and shipments of currency and gold by the New York banks.

West Ending Oct. 23, 1891.	Received by N.Y. Banks.	Shipped by N. F. Banes.	Net Interior Movement.
Ourrency			Loss. \$1,799,000 Loss. 1,350,000
Total gold and legal tenders	\$1,891,000	\$5,040,000	Loss,\$3,149,000

CHANGED CONDITION OF MOBILE & OHIO.

The history of railroad properties in the United States in recent years has presented many disappoint-Reduced earnings, vanishing dividends and steadily-shrinking values have produced a situation which has been the reverse of cheering, and though our bounteous harvests ensure a change for the better now, past unfavorable conditions have left distinct marks of their presence in results, and the process of recovery is slow. But the tendency has not been entirely in the one direction. Here and there we find evidences of an opposite course of affairs-evidences showing that certain properties have had a different and an independent career, and have moved towards direction; for they made it possible to operate improvement and prosperity at a time when so many the road at a minimum of cost and thus enabled other systems have experienced reverses and misfor- it to take business at the steadily-diminish-

tunes, and been drifting towards a lower plane of pros perity.

The Mobile & Ohio is one of the fortunate few of the latter class-one of the exceptions to the general rule. And the altered situation and prospects of this property, wholly the development of the last few years, adds another to the many proofs we have previously had that in the United States a railroad system, even if possessing no special advantages as to location or territory, can by close attention to details on the part of the officials, and a careful fostering of the road's traffic interests, be gradually raised to a position where prosperity and profit for the shareholders are in sight. The truth is, the United States presents so many and such varied opportunities, and population and industries keep so continually expanding, ensuring new and larger activity and widening consumptive and productive capacity, that if a management will only avail of the opportunities afforded and give the property under their charge the full benefits, the future can never be in doubt, even in the sections not the most favorably situated. That is certainly an assuring perspective, for by bestirring themselves it is always within the power of owners to secure a management that will be at once honest (honest in the full significance of the word), energetic and efficient-the three requisites that ensure success.

The Mobile & Ohio is not a large system. It comprises less than 700 miles of road, and it is not supplied with a great number of branches. Besides this, the area immediately tributary to the system has perhaps been less favored by nature than most other sections of the country. Moreover, a considerable portion of the traffic of the system has to be taken in competition with other roads, and hence realizes only very low average rates. Yet in the face of all these disadvantages the property has developed during the last few years in such a marked way that its prospects and condition have completely changed. The change is well illustrated in the fact that whereas but a short time back it was a question whether the road could be depended on to earn its fixed charges, now there is (under the growth of traffic and income) a clear surplus over and above the charges, and some of the shareholders are grumbling because the management does not see fit to distribute said surplus in the shape of a dividend on the stock.

Going back a few years and looking for the causes of the change, it is easy to trace several important steps in the road's career which have contributed to bring about the present improvement and prosperity. In the first place, the acquisition of the St. Louis & Cairo, giving the Mobile & Ohio a northern terminus and outlet at St. Louis, was evidently a wise move. Not less important was the securing of the services of Mr. J. C. Clarke as President and General Manager; for Mr. Clarke is a practical railroad man, thoroughly familiar with the section of country traversed by the road, and who knows how to develop the possibilities of the system. Then the adoption of a well-matured and carefully considered plan of financiering, by which the various classes of preferred incomes were retired and means furnished for supplying the company's needs and placing it in easy condition financially, was also an essential element in the new order of things. The providing of motive power and equipment for taking care of additional business, and the carrying out of a judicious system of improvements, were aids in the same

the extension of the traffic of the system, and which, traffic. We get some idea of what has been done in the way of providing additional facilities by examining the exhibits of the company's rolling-stock. On June 30, 1887, the road had only eighty-eight engines; now it has 110, which is an increase of just 25 per cent in four years. The number of freight cars in the same period has been increased from 2,262 to 3,338, or nearly 50 per cent, and the number of construction cars has been increased from 105 to 176, and the number of passenger cars from 56 to 66.

ing rates which have come contemporaneously with

As regards rates, the decline has been really striking. Twelve years ago the average received per ton of freight per mile was almost 2½ cents (2.48 cents). As recently as 1885-6 the average was as much as 11 cents per ton mile. For the late year the average was only a little over seven-eighths of a cent (0.89 cent). These figures are for the Mobile & Ohio proper and do not include the St. Louis & Cairo, where the average is still lower, and where there has been a decline from 1.489 cent per ton mile in 1886-87 to only 0.802 cent in 1890-91. And yet in the face of these low rates and the large decline in them which has occurred, the road has been able to show steadily-improving results as to earnings and income. Why? Because the traffic of the road has been developed in such a marked way, in part as the result of these low rates. In 1885-86 the freight movement of the road was represented by less than 98 million ton miles; for 1890-91 the amount was 226 million tons. The St. Louis & Cairo in 1886-87 carried 20 million tons one mile; in 1890-91 it carried just four times as much, or 80 million tons. Thus the gain in traffic has been so large that even with declining rates revenues have steadily risen. The earnings from the freight traffic were \$1,464,000 in 1886-87 and no less than \$2,010,000 in 1890-91, while in the same time the freight revenue of the St. Louis & Cairo advanced from \$298,000 to \$642,000. There has also been growth in passenger revenues in the interval.

As a result of this expansion in revenues, secured through the carrying out of plans having that end in view, the road has been raised to a position where, as stated above, it has earned not only all its charges, including full cash interest on the general mortgage bonds, but also a surplus over and above such amount. The surplus for the twelve months is \$145,213. The amount of the capital stock being only \$5,320,600, this is equal to over 21 per cent on it. The result is satisfactory and pleasing, but, as already intimated, there are differences of opinion as to how the surplus should be treated. Some of the stockholders think that an immediate distribution should follow, and these holders criticise Mr. William Butler Duncan, the Chairman of the Board, for not yielding compliance to their wishes. As we understand the situation, however, Mr. Duncan, knowing that the best interests of the company do not warrant such a course at the present time, is firm in the determination not to make a dividend.

We cannot but think that the attitude of Mr. Duncan is to be commended. A wise, conservative policy has been pursued in the past, and it were to be regretted if a different policy should be entered upon now. Assuming that the property can be brought to yield permanent returns to stockholders, the time for the beginning of dividends can be deferred with advantage. Wonderful progress has been made, but the property island accessible, and thus to add to the value and de-

will be further strengthened and improved by a continuance of the policy that has raised it to its present promindeed, were necessary to secure such extension of the ising basis. The surplus of \$145,213 was used to meet in part the year's requirements for new equipment and new construction. The company has about two millions of general mortgage bonds, by the sale of part of which it could reimburse itself for the outlays made. But these bonds do not at present command a high enough price in the market to warrant their sale. They bring 66, and the officials think that for a four per cent interestpaying bond that is too low. The reason for the low price is found in the past situation of the property. It is only recently that doubt as to the ability of the company to meet full cash interest on these bonds has been removed. Should the management maintain the old conservative policy the bonds will doubtless gradually appreciate in value, and a better opportunity be afforded of disposing of those in the treasury.

The Mobile & Ohio is in the position of a business man who for a long time has found it difficult to make both ends meet, but who has finally reached a year where his business has netted him a good balance on the right side of the account. Sound judgment would dictate that such a man should keep that balance in his business, and thus improve his prospects for the future, rather than draw the money out and devote it to personal uses. There is a further consideration that should influence stockholders in the Mobile & Ohio to prudential action. The road's traffic is so largely competitive that it is absolutely essential to good results that the property should be kept in excellent condition, both financially and physically, so as to cope successfully with rival lines. Out of 226 million tons of freight moved one mile in the late year on the Mobile & Ohio proper, no less than 174 million tons is classed as competitive freight, and out of 80 millions carried on the St. Louis & Cario 581 millions was competitive. The average rate on this competitive traffic was only 759 thousandth of a cent per ton per mile in the one case and but 714 thousandths of a cent in the other. Considering the requirements of such a situation, it is evidently the part of wisdom, especially at a time like the present, to keep the treasury situation easy rather than deplete its resources by the payment of a dividend. The object must be to improve the company's credit, to the end that it may borrow, when borrowing becomes necessary, on advantageous terms. Such a policy will also be best for stockholders. It may keep them out of a return for a time, but it will make dividends surer when they do come.

THE RAPID TRANSIT PLAN.

The subject of rapid transit for New York City has more than a local interest. Every one whose business brings him to New York, or who comes here for pleasure, is interested in seeing the means of transit between the different parts of the city made quick, easy and perfect. Hence the report of the Rapid Transit Commissioners published this week will attract wide and general notice.

The need for better facilities of travel is urgent. At present there is no way of going quickly from one end of the city to the other. The elevated roads are a decided improvement on the horse cars, but they do not meet the requirements of the situation. They are performing a useful public service, and they have contributed in no unimportant degree to make the upper end of the

sirability of property in that section. We do not share of a deep-tunnel system would not meet with favor. the views of those who are heaping indiscriminate abuse on these roads. On the contrary, we think the roads have done remarkably well-far better than there was any reason to anticipate they would do when they were opened. Still, one cannot shut his eyes to facts, and a patent, undisguisable fact, with which New-Yorkers are confronted every business day in the week, is that the means of transit supplied by the elevated roads are entirely inadequate to the city's needs.

Least of all do the elevated roads give us rapid transit. At the hours when there is the most need for quick service-that is, in the evening and the morning-they break down completely. At such times it is easier, as well as more pleasant, to go to one of the suburbs on Long Island or in New Jersey than it is to reach one's home in Harlem or Yorkville. That is to say, it is actually easier to get away from New York than it is to stay in New York. The cable cars on the Brooklyn Bridge handle a hundred thousand passengers or more every day, easily, expeditiously and safely. And the tide of population is turning very strongly in that direction. We were surprised recently to find how many of the present residents of a suburb on Long Island had formerly been residents of Harlem. Nor does there seem any way to make the elevated roads fill the requirements of the case-requirements which call not only for quicker service but also for capacity to handle a steadily expanding traffic year by year. The engines are not powerful enough to haul heavier loads, and the structures are not strong enough to support such loads, while the platforms are entirely inadequate to accommodate them. Then the roads are lacking in terminal facilities, and have no tracks for running through express trains independent of the way trains, so that the limit of speed is that fixed by the service which provides for the making of stops and the letting off and taking on of passengers at every station. In a word, the elevated roads, though very useful, cannot furnish the kind of transit especially required.

The Rapid Transit Commissioners appear to have been fully alive to the necessities of the situation and earnest in their determination to provide a solution of the problem. As far as can be judged, too, at the present time, they have been successful in proposing a plan which, if the means to carry it out can be obtained, promises to furnish the city with transit on a large and comprehensive scale, capable of meeting both present and probable future needs. The report is undoubtedly an able one, and is thorough and exhaustive. The arguments in favor of the various features of the plan, and the reasons that influenced the Commissioners in their action, are stated clearly and with much force. Two main routes are provided, one along Broadway and the Boulevard, and the other diverging from this at Fourteenth street and running along Fourth avenue and Madison avenue. There are to be four tracks on the same level over both routes till the upper end of the city is reached, and beyoud that double tracks. The road is to run through tunnels for a great part of the distance and thence by viaducts, and the tunnels are to be built as near the surface of the streets as regard for sewer pipes and watermains and the foundations of underground structures will permit.

This latter feature-namely, the adoption of shallow rather than deep tunnels-is undoubtedly the feature

While such a system would we presume be just as safe as any other, the thought of going down into the bowels of the earth, far away from all sunlight, is abhorrent to most persons, and they could not readily overcome the dread of making the journey, and would not make it if any other means of transit existed which offered reasonably quick even if inferior service. These are mere sentimental considerations, but they are considerations which are entitled to much weight. If it were possible to obviate it, no form of underground road would be tolerated; unfortunately, however, the underground method seems to be the only one available for the lower half of the city. But while accepting the inevitable, the public desire is to have the underground road as near air and sunlight as circumstances will permit.

There are, however, practical as well as sentimental objections to a deep tunnel scheme. These objections are carefully set out in the Commissioners' report. A deep-tunnel road, they show, would require elevators as a means of access, and stairways would be necessary in addition. Modern and improved elevators, they add. would doubtless provide for the regular volume of traffic at ordinary stations, but are not believed to be adapted for large crowds such as must frequently gather on a line of transit under Broadway. "Stairways one "hundred feet more or less in vertical height would be "of no avail as sources of relief for crowds moving "upward, and would be extremely dangerous "for crowds moving downward." The Commissioners show a proper grasp of the problem when they maintain that ready accessibility by means of short, broad and commodious stairways, supplemented where necessary by elevators, is alsolutely essential. This would not only give a feeling of security to those using the road, but would provide security. Moreover, ventilation and drainage are very important, and the difficulties in regard to these, as the Commissioners well say, increase with every foot of The further conclusion of the Commission, that a deep, subterranean line, with elevators, would not attract short-trip passengers, and that the shorttrip business is essential for the success of a road the cost of which approximates that of a four-track tunnel in New York, is also founded on sound common

As to the routes selected, an obvious criticism is that they do not take in certain important sections of the city. Below 59th street the Broadway line will be out of the reach of the population of a large part of the West Side-say persons residing on Ninth and Tenth avenues or further west. The East Side line could with propriety be termed a central line. It is laid out, as already said, along Fourth and Madison avenues, and hence will lie far to the west of the Second and Third avenue elevated lines, and must accordingly be unavailable to a considerable proportion of the population of the East Side all the way up to the Harlem River. But we are not to suppose that these sections, either on the West Side or the East Side, have been overlooked. It was felt no doubt that having in both cases the elevated roads to serve them, their needs would be met by relieving those roads of the congestion of traffic which now interferes with their rendering quick and efficient service. The opening of the new rapid transit lines would have the effect of removing this pressure, and thus the elevated that will most commend itself to the public. The idea roads would be free to develop and serve the interests

of the population naturally tributary to them. On the other hand, the new lines while tending to give relief to the elevated roads, will at the same time furnish what is above everything else called for, namely, means for quick that time through travel between the upper and lower ends of the city—a class of traffic which the elevated roads can never hope to provide for. In other words, the new lines, while taking some of the existing traffic, will create much new traffic. Looked at in this way, the rapid transit lines will not supplant the elevated roads, but merely supplement them—each being free to develop its own special fields, thus permitting both to attain their highest usefulness.

Of course it is yet to be determined whether capital in sufficient amount can be secured to carry out the new undertakings. But certainly there ought to be less difficulty under a scheme having the merits of that now submitted than under any other. Should the enterprise find the necessary financial support, then New York will at last be given a system of transit commensurate with its needs.

NA VARINO AND NOW.

Among the more interesting items of foreign news received during the course of the week was that regarding the celebration at St. Petersburg of the famous naval battle fought in Grecian waters in 1827, and bearing the name of Navarino. A feature of the celebration in the Russian capital on Tuesday last was the launching of three ironclads, one of them, the largest and most powerful, taking the name of the naval encounter referred to.

The name Navarino is more than ordinarily suggestive at the present time. It carries the mind back to a most interesting period of European history; and it has an intimate relation to a long-continued series of events of which we have not yet seen the end. Greece was then in the throes of that revolution which secured for her the sympathy of all the civilized nations. The Turk, however, refused to yield to her demands; and the Turk had a powerful and skilful servant in Ibrahim Pasha, son of the ruler of Egypt, Mehamet Ali. At the head of a fleet of 130 ships, of which eighty-nine were ships of war with 2,438 guns, he terrorized the Hellenes and ravaged their coasts. Meantime a treaty looking to the enforcement of peace was signed in London, and the allied fleets of England, France and Russia appeared in Grecian waters. Greece was to be tributary but otherwise independent. Ibrahim at first yielded to the demands of the allies; but, provoked by some doings of the Greeks, he let loose his forces on the coast of Messenia, and inflicted terrible damage. A collision was now inevitable. The allied fleet, which was under the command of the English Admiral Codrington, was weak in comparison with that of Ibrahim, consisting of only twenty-seven ships with 1,276 guns. But there was no comparison of the skill which was ranged on either side. In four hours, during which for a time three thousand cannon thundered, from five thousand to six thousand of the Turks and Egyptians were slain, and the entire fleet was in fragments.

It was a great victory. It was a great victory for Russia, although it was not one in which she bore off taken by England, Russia, Austria and Prussia—France the highest honors. It was noticed at the time that the Duke of Wellington caused the king to speak of the victory as an "unfortunate event." The reason was According to this arrangement, it was agreed, among

Russia's ambitious designs upon Turkey had already become plainly revealed; and the destruction of the fleet of the latter left her at Russia's mercy. From that time down to the present the wisdom of the judgment attributed to the Duke of Wellington has been more and more clearly seen, because Russia's purpose in the direction of Constantinople has never ceased to be active. Within a few months Russia took advantage of her opportunity, Turkey being crippled alike by the state of things in Greece and by the massacre of the Janissaries; and in two campaigns, the victorious Russian General Diebitsch was in possession of Adrianople. It was the treaty then signed between the two Powers which first brought the question of the Dardanelles prominently to the front. By the treaty of Adrianople, September 14, 1829, Russia obtained such concessions as made her mistress of the eastern shores of the Black Sea, with full privileges of navigation of the same. All restrictions were removed from the navigation of the Danube; and the Dardanelles was thrown open to the merchant vessels of all nations, without distinction, at peace with the Porte. In the matter of trade and commerce, Russia gained immensely by this treaty.

It soon became manifest, however, that she had not gained all she wanted. The treaty of Adrianople did dot give much satisfaction among the European States, but no protest was raised. A change, in fact, had begun to come over the European mind in regard to the affairs of the East. Russian growth and ascendancy began to be viewed with alarm. It was no longer Turkey which was the dangerous power; it was Russia. This feeling was not improved by a series of events which tended to Russia's advantage. Mehamet Ali had turned his arms against his master; and his son Ibrahim, after a series of victories, was threatening Constantinople. The Sultan called in the aid of the European Powers. Russia responded to the call for help, but France and England refused, threatening if Russian interference went too far to go to the aid of Egypt. In the emergency, and somewhat disgusted with the other Powers, the Sultan signed with the Czar, July 8, 1833, the treaty of Unkiar Skelessi; and in a secret article agreed to close the Dardanelles to all war vessels except those of Russia. In this treaty the aggressive purpose of Russia was made unmistakably and offensively manifest. It was hardly conceivable that it would be allowed to last.

Mehamet Ali was no better pleased with this last treaty than were the Western Powers, although his reasons for dissatisfaction were different. He had been. robbed of what he considered his gains; he had been hindered of his purpose; and the Sultan had provoked him by an attempt to recover Syria, which had been secured to the Egyptian ruler by the previous treaty. Ibrahim again wins a series of victories. The Turkish Admiral revolts, and places his fleet at the service of the Egyptian General. The way to Constantinople is again open; and the situation is all the more serious that Mehamet Ali has set his heart on the Imperial Throne of the East. It became a necessity for the Powers generally to interfere, if Russia was not to be allowed to have things absolutely her own way; for Russia, it was known, was again ready to take action. But they were not all of one mind. France having already, and for purposes of her own, espoused the cause of Egypt. Action was taken by England, Russia, Austria and Prussia-France ultimately agreeing; and a convention was signed in

other things, that the Straits of the Bosphorus and the Dardanelles, in conformity with ancient usage, should be closed against all foreign vessels of war as long as the Ottoman Porte should enjoy peace, the Sultan reserving to himself the right, as of old, to grant firmans of passage to small vessels of war employed in the service of ambassadors of friendly Powers. This treaty, it will be seen, was a complete set-down to the Czar Nicholas. He bore it, however, with as good grace as posssible, as he felt satisfied that he had been successful in humbling Louis Philippe, whom he heartily disliked.

This treaty remained in force until the outbreak of the Crimean war in 1854. It is unnecessary to go into details as to the causes of this great, disastrous, and in some important respects fruitless, war. Suffice it to say that the radical cause was Russian ambition. We know the result. The treaty of Paris which followed the war was very much a repetition of the arrangement of 1841. The Danube was to be free, Black Sea was neutralized; as before. The all ships of war, including those of Russia and Turkey were to be excluded, except a small number of light vessels to protect the coasts, and Russia was forbidden to build fortresses in said sea or on the shores. By a special convention Russia and Turkey agreed to limit the number of vessels on each side to ten-six of them not to exceed eight hundred tons and four of them not to exceed two hundred tons each. It is obvious that this treaty was in a very high degree obnoxious to the great Northern Power. It was a foregone conclusion in fact that Russia would take advantage of the first opportunity to undo what had been done. The opportunity came in 1870, when France was helpless in the grip of Prussia. On October 30 she issued a note declaring that she could no longer be bound by the Treaty of Paris as to the number and size of vessels which she might maintain on the Black Sea. As England could not at the time go to war alone for a clause of the Paris treaty, and as Bismarck was willing to do Russia a favor, a convention was held in London; and on March 31, 1871, the clause providing for the neutralization of the Black Sea was abrograted. This time Russia gained a victory.

The next stage is marked by the Treaty of Berlin. The commencement of that war was quite as strikingly illustrative of the persistency of Russian purpose as was the commencement of the Crimean war. Into the details of the struggle we do not need to enter. It is the same old story-Russia pressing southward and westward on the one hand and Europe resisting on the other. In no document was Russian purpose more clearly revealed than in the treaty of San Stefano. But Europe would not have it; and the Treaty of Berlin took its place. Not to mention the other numerous features and provisions of the treaty of Berlin, it confirmed the arrangement of 1854 in regard to the Dardanelles and the arrangement of 1871 in regard to the Black Sea. Russian purpose and Russian persistency were again revealed in 1886, when, without consulting any of the Powers, she made Batoum a close port, and proceeded to fortify the harbor. In the same line of policy, and illustrative of the same ancient hereditary, undying purpose, were the recent experiments with the transports in the Dardanelles.

The chain of events from Navarino till now is a long one; but after all that war and diplomacy has been able to accomplish, Europe is still facing the same difficulties and is perplexed with the solution of the same great question.

LIFE ANNUITIES.

The increased attention which has for several years past been given to annuities in the practice of life insurance and the prospect that they will play an increasingly important part hereafter make it worth while to consider them. A few companies in this country have done a little with annuities, but not many have published rate tables for them, and they are not even now treated distinctly or prominently in the official reports. We find as below for 1882 the returns of the annuity business of the companies represented in this State which give a record of it. We have added for comparison the figures for the years 1889 and 1890.

Note—The Northwestern reports receipts on this account of \$1,822 and the Phoenix of \$000 during 1890.

Below we give a table of rates for a sufficient number of ages to represent the present practice.

	Old r	ates-	Present		
	Purchase		Purchase	Equiva-	Expecta-
	money for	Annuity	money for	lent of	tion of
Age at	an annusty	for \$100	an annuity	\$100	Life-
starting.	of \$100.	sunk.	of \$100.	sunk.	years.
40	\$1,339	\$7.47	\$1,490	26.71	28.2
45	1,264	7.91	1,383	7.22	24.5
50	1.165	8:58	1,255	7.97	20.9
55		9.66	1.120	8.92	17.4
60		11 19	975	10.25	14.1
65	776	12.88	829	12.06	11.1
70	634	-15.78	710	11:08	8.5
75	499	20.05	616	16.22	6.3
80		25.62	543	18:41	4.4

This skeleton table gives first the purchase-money to be paid down for which may be obtained an annuity of \$100 for life, the first payment to be made in one year from the date of the transaction. It is noticeable that there has been a considerable increase in the cost of annuities or decrease in the annuity value of a dollar principal (which is the same thing), and we should add that the present rates are by no means certain to be maintained very long. The payment of annuity may be made semi-annually or quarterly at some increase of cost; thus, at 50 as age of entry \$100 sunk will buy \$3 90 and \$1 93 semi-annually and quarterly, which is 16 and 24 cents less in the year than by the annual payment. To the above we add, for comparison, the "expectation of life" at the ages given. We also compare, as below, the American rates with those obtaining in Great Britain.

Age of Starting.	American Rate, \$100 Sunk buys an Annuity	Maxi-	British O. Mini- mum.	Mces.— Aver- age,	British Government Rate.
50	\$7 97	\$7 33	\$6 98	\$7 15	\$6 21
60	10 25	9 77	8 99	8 05	8 05
70	14.00	10.00	10.08	0.00	11.72

These rates, in both countries, are on male lives; on female lives the rates are somewhat higher. The American company whose rates we quote makes an extra charge upon female lives as compared with male up to age 48 when writing insurance, which means a difference in mortality unfavorable to the female; the higher annuity charge upon females, on the contrary, would suggest that they are reckoned more persistent survivors as annuitants. The fact is that the higher insurance rate is according to experience; the higher annuity rate has no mathematical basis.

The simple interest received by the purchaser of an annuity ranges from 6.04 per cent at 40 to 7.96 at 50,

the the

an 50,

understood that these are the ages of setting out, and that an annuity (unless in some case by a special agreement) never increases. Comparing \$100 annually with the amount which will purchase it, it is plain that the company is promising much larger return than it can realize from the use of the deposit money; to pay seven to eighteen dollars a year for the use of \$100, or \$100 a year for the use of \$543 to \$1,489, looks at first sight like a losing bargain. But the recompense comes in the exhaustion of the contract, and in this insoluble uncertainty as to the duration of the life contract lie all the difficulties and perplexities of the business. An annuity may be called the reverse of life insurance. One looks forward to death as its consummation and the reaping of the benefit in money; the other begins at once and is ended by death. One pays instalments to the company periodically and is to withdraw a lump sum at death; the other pays in the lump sum now and begins to withdraw instalments. One, we may say, contracts to give an uncertainty for a certainty; the other gives the certainty for the uncertainty. business is a Tontine in essence, in that each member is to receive a return largely beyond the current earnings of his* deposit, but is to forfeit at death his interest to the survivors; but there is this very great difference, that successive deaths do not at all affect the income of the survivors, while in a Tontine the moving spring is the fact that the share of each decedent reverts to the survivors until the last is gone.

If one wishes to take an individual case as illustration, one will find that the fund is diminished each year by the difference between the annuity and the actual earnings realized on the fund itself, and that the rate of diminution is progressive. Starting at age 50 and assuming 5 per cent, the deposit is exhausted within 19 years; at 4 per cent it does not last quite 17; at 34 per cent 15 years will consume it. If the pensioner of 50 fulfills his "expectation," then he more than consumes the principal and its increment, upon any interest rate. and the few persistent ones who hang on to a still greater age become a still heavier burden. This is compensated in the insurance element. In each case the buyer of an annuity insures himself, the "self-insurance" here differing from that in life insurance in that, in this aspect, each one does it for himself and stands alone. He stakes his entire deposit for the first year, for if he dies within that year the company has the deposit without drawback. In the second year he virtually insures his life with his entire deposit, less such portion of the year's annuity as he could not or would not have earned by handling it himself. And so on forward. Every year his stake, upon his lasting * year more, diminishes.

The "expectation" given above is for selected lives, and naturally the vitality standard would be a little lower among annuitants, since the company has for those no standard of health and no medical examination. Naturally, the stronger a man believes himself to be the less he feels drawn towards life insurance pure and simple; the shakier he thinks himself the better he thinks of insurance and the lower his estimation of an annuity. Either way, as the company wants him more he wants the company less, and vice versa. It will not refuse him the annuity because he is too

10.25 at 60, 14 84 at 70 and 18.45 at 80, it being always latter could be done, only it would be speculation in the duration of individual lives, which is a proceeding safe only for irresponsible concerns. Such concerns have in fact been addicted to it, and it began in that way, as may be said of life insurance also with measureable truth. It is now hard to believe, says the London Review (insurance), that there was ever a time when, without reliable data of any kind on which safe prices could be calculated, single individuals were eager to sell annuities on the lives of other persons, equally ready and eager to buy them, and that the entire annuity business of Great Britain was of this sort. It was the sheer spirit of gambling, and so understood. The annuity depended on the life and honesty of the seller as well as on the life of the buyer, and the hazard was so well recognized that the purchase price of an annuity then seldom exceeded its value for seven years.

> The British Government, under Mr. Pitt, attracted by the large profits at that time derived by the leading life insurance offices, thought there was an opportunity, and therefore devised a scheme, for reducing the national debt by means of annuities; those were in ready demand, but a mistake was made in using the Northampton mortality table, which was quite unsuited to the purpose, so that annuities were offered too low, with a disastrous result. In our own times the Water-Works Company of the city of Munchester, with a better opportunity for knowledge, undertook an annuity scheme by which about £100,000 loss was incurred in a little more than twenty years. The Government, however, on discovery of the error, repaired it, and have gone so far in the other direction that, as already shown, the Government price is more onerous than that of the companies.

An annuity is a good thing in cases where it fits, and it is so unlike insurance that there is little likelihood of any case arising where it is reasonably doubtful which of the two fits the better. Naturally the man who seems to have a long life before him thinks he can do better with money than to sink it for a life stipend; on the other hand, a company is not likely to pick up good bargains in the shape of very shaky annuitants, for if a man is satisfied he cannot possibly last more than a few years longer he can consume his principal himself, with the chance of also having some remainder to endow survivors. Yet in case of old men who from the dollar view only are an increasing care upon relatives, an annuity may fit excellently, for its avails will pay the relatives for their care and give an inducement to keep the man alive to the uttermost, whereas an in urance on him would not only lack insurable interest but would throw the inducement upon the wrong side. Of course this sordid view is not pleasant, but it exists in real life, and in some cases where relatives were about to attempt the appointment of a guardian over the property, on the plea of senile incompetency, by converting the coveted property into an annuity (a very quickly done and quite final transaction), the position has been adroitly shifted. There is, moreover, an advantage, too obvious to need pressing, in exchanging the cares and worry of business and the risks of investments for the peace and serenity of an assured income without further thought than to watch for the dates of

The London Review, while saying that the everhealthy, nor will it invite in the tottering by the bait | decreasing interest rate allowed by the Government is of a higher stipend. On arithmetical grounds the | practically putting Government annuities out of the mar-Both because of its remarkable vividness and dramatic interest, and because it collaterally illustrates this subject, we suggest the reading of an English story, "The Great Tontine," by Hawley Smart.

has not shown any falling off, the amount of stock annually transferred as the purchase price having varied little from £900,000 during the last seven years; the reason is that the purchasers are among a class with whom ancient traditions die hard, and the increase in annuity business is among the companies. Because of the intrinsic comfort of annuities, and because the decline in interest which reduces their yield also narrows the field of investment and heightens its difficulties, annuity business will doubtless go on increasing in this country. We should add that annuities are also working into life insurance practice as afterthought and alternative, being incorporated in the options offered for settlement of Tontine policies, and offered as an alternative to receiving the avails of policies in present cash to beneficiaries of policies terminated by death.

IMPORTS AND EXPORTS OF GOLD AND SILVER AT SAN FRANCISCO.

The Collector of Customs at San Francisco has furnished us this week the returns of imports and exports of gold and silver for the month of September through that port, and they are given below, in conjunction with the figures for previous months of the calendar year 1891. The imports reach a heavier aggregate than in any other month of 1891, the total of gold being \$1,137,711-largely from Australia-while of silver there was imported from Victoria, Mexico, &c., \$197,519 There has been received during the nine months a total \$2. 999,211 gold and \$2,103,420 silver, which compares with \$1,-760,330 gold and \$2,684,120 silver for the like period of 1890. The shipments of gold for September were \$75,000 coin to Honolulu and \$22,332 coin to China. Of silver China took \$730,434 Mexican dollars and \$15,300 bullion, and \$194,800 Mexican dellars and \$29,000 bullion went to Japan. For the nine months the exports of gold have been \$1,117,752, against \$961,742 in the same months of 1890, but only \$4,812,139 silver has been sent out, against \$5,062,515 in 1890. The exhibit for September and the nine months is as follows:

CONDITION OF NEW YORK BANKS, NATIONAL AND STATE, OUTSIDE OF THE CITIES OF NEW YORK AND BROOKLYN.—We have received this week from Mr. E. S. Lacy, Comptroller of the Currency, the abstract of the condition of the national banks in the State of New York outside of the cities of New York, Brooklyn and Albany, and also the abstract for Albany, at the close of business on Friday, September 25, 1891. From them and from the latest statement of condition of the State banks—that of September 12—kindly furnished by Mr. Charles M. Preston, Superintendent of the New York State Banking Department, we have compiled the following, which gives the results for all the banks in New York State outside of the

cities of New York and Brooklyn. The totals for State banks do not include either savings banks or trust companies.

Monetary Commercial English News

[From our own correspondent.]

LONDON, Saturday, Oct. 10, 1891.

During the week ended Wednesday night, gold somewhat exceeding three-quarters of a million sterling was withdrawn from the Bank of England for the United States, Germany and Egypt. It was generally expected, therefore, that on Thursday the directors would raise their rate to 4 per cent. The coin and bullion had then been brought down to about 231/2 millions sterling, and the reserve was under 14 millions sterling. The outflow of coin to Ireland and the provinces is still going on, and the withdrawals for abroad are likely to be large. But the Directors made no change. Apparently they believe themselves unable to raise rates in the outside market since the joint-stock banks will not support them. For the moment the supply in the outside market has been increased by the payment of the interest on the national debt; but probably next week there will be an advance. Meantime the competition in the outside market is so great that money from day to day is freely lent at 34 per cent and the discount rate is only about 2% per cent.

The silver market continues very quiet. There is no speculation, the demand for the Continent is small, and the Indian demand is less than it has been for a long time past. Last year, it will be recollected, the exports of the metal to India were on an enormous scale. Evidently they were larger than the country required for the moment, and it will be some time, therefore, before India is able to obsorb all that has been sent. Meantime, however, the exports are very large, and by-and-by a demand will spring up. Just now, on the other hand, it is to be recollected that the rice crop has failed in Madras and some other parts of the country, and further, both in China and in the Straits Settlements there has recently been a very wild speculation in mining and other shares. The crisis that has followed has involved the native speculators in heavy losses. Very many of them have been ruined, and the banks, especially in Singapore, have suffered

As an instance of how heavy the losses are, it may be mentioned that the chartered Mercantile Bank of India, London & China this week has issued a report in which it states that to meet losses in Singapore it last year appropriated a sum of £75,000. In addition, this year it has to take £125,-000 from the reserve. The two sums together make £200,000; and besides this all the profits of the present year are gone, so that no dividend can be paid. There are three other banks doing business at Singapore, and it is understood that two of them have lost nearly as much as the Chartered Mercantile; the fourth has escaped more easily. Still there is no fear of serious embarrassments in any of the banks. They are well managed, and they have boldly faced the situation and proved themselves equal to it. The price of silver is 443/4d. per ounce.

The stock markets have been uncertain in tone this week. The American department has been stronger in con-equence of the recovery in New York on Friday of last week. But though the large operators are as confident as ever, and look forward to a further considerable rise, the smaller speculators have lost courage and have been selling all the week. It is believed that most of them have now cleared out, and a very early advance is looked forward to. In other departments, however, there has been much weakness. In the first place, the German and Austrian Bourses are depressed and the sales from both are so large that it looks as if Paris were unable to absorb all the stock offered. The Credit Foncier loan has not been as great a success in France as was expected, and already the Russian loan is at a discount of from ¼ to ½. It is said that this is due to the unwise conduct of some of the banks forming the syndicate. They have offered their clients a discount of 34 per cent if they will subscribe. Many of their clients have readily accepted, and are now selling at the discount mentioned to cover themselves. Over and above this, the report of the Chartered Mercantile Bank of India, London and China has made a bad impression, especially as it was followed immediately by a report of the Bank of South Australia announcing that the whole of the reserve had to be appropriated to cover losses, and that in addition £6 per share would be written off from the capital. The report came as a complete surprise and caused much indignation, for about two months ago, when the shares began to fall heavily, the directors issued a circular stating that there was no reason for the depreciation that had taken place. It is now said that they acted on the advice of their manager in Australia. He has since been removed and the new manager has recommended the steps that have now been taken. Naturally, however, the report has caused fears that other Australian banks may be in a bad way. The best informed are of opinion that there is little foundation for the fear. There is no doubt, of course, that losses have ensued from the wild speculation in real estaté that went on some time ago; but for all that it is believed by well informed persons that the banks are quite safe. It may be added, as telegrams from New York say that apprehension is enter aimed there of serious financial difficulties in London, that the best informed here are convinced that there is no ground for the apprehension. There will of course be failures from time to time. After such a crisis as we have passed through that is inevitable. But no serious failure is likely to occur. Abundant time has been given to make the necessary preparations and it has been fully availed of.

Subscriptions to the Russian loan were invited simultaneously on Thursday morning in Paris, London, Amsterdam and Copenhagen. It amounts to 500 million francs, or £19,775,000, and the i-sue price is £78·17·0 per bond of £93·17-16—being just about 79% per cent.

The Board of Trade returns for September and the first nine months of the year are fairly satisfactory-somewhat more so indeed than those for August when we take into consideration that the exports to the United States were swollen last year by the efforts to anticipate the McKinley tariff. The value of the imports for the month, compared with September of last year, show a falling off of £1,362,000, or about 3% per cent. For the nine months there is an increase of £5,253,000, or about 134 per cent. The decrease in the value of the exports of British and Irish produce and manufactures was £1,971,000, or about 8½ per cent. For the nine months the decrease was £9,984,000, or about 5 per cent. Some improvement in the cotton trade is beginning, as it is anticipated that owing to the small crop there must be a rise in prices by and by, and the better feeling in the iron trade also continues.

The weather has not been favorable during the week. There has been a good deal of rain and much wind, but the wheat market is still very quiet.

The Board of Trade returns for September compare with those of previous months as follows:

	1891,	1890.	Difference,	Per Ct
IMPORTS.	£	2	£	
January	33,741.082	38,143,850	-4.402.768	-11:54
February	33,311,354	31,018,842	$\pm 2,292,512$	+ 7:39
March	35,253,059	36,140,334	- 8 7.275	- 2.45
April	38,982,537	35,680,242	+3,302,295	+ 9.25
May	34.377.698	33,341,005	$\pm 1.036.593$	+ 3.10
June	36,850,124	32,926,295	$\pm 3.923.429$	+11.91
July	32,824;111	33,082,629	-258.518	77
August	32,746,279	31,322,897	+1.423.382	+ 4.54
September	34,189,301	35,551,688	-1,362,387	- 3.83
9 months	311,878,181	306,625,138	+5,253.043	+ 1.71

The total exports for the past nine months show tho following contrast:

	1891.	1890.	Difference.	Per Ct
EXPORTS.	2	2	Æ.	
January	19,834,315	21.586,752	-1,752,437	- 8.11
February	20,470,621	21,081,228	-613,607	- 2.91
March	21,663,378	20,067,022	$\pm 1,596,356$	+ 7.95

WALL STREET, FRIDAY, OCT, 23, 1891-5 P. M.

The Money Market and Financial Situation .- On another page will be found a table giving the highest and lowest prices of leading stocks, arranged by groups, for the past twelve years, including the current year 1891 from January 1 to date.

There has been a distinct improvement this week in one feature of Stock Exchange dealings, and that is in the better investment demand for railroad bonds. Heretofore the active transactions had been mainly confined to the income speculatives and they had sharply advanced while the mortgage bonds scarcely changed in price; but now there is a better inquiry for the mortgage bonds at rising prices.

There has been quite a general lamentation at the Cotton and Produce Exchanges of late over "too heavy receipts." At the South cotton has been pouring in at a rate heretofore unparallelled, and the receipts of wheat in the Northwest have been on a scale of similar magnitude. This superabundance of products heaped on the markets has been unfavorable for the maintenance of prices, and they have yielded for the time being; but the situation is one which railroad men and stockho'ders can contemplate with entire satisfaction, and with every freight car pressed to the utmost it would seem that October earnings on the railroads in those districts ought to make a good showing.

The monetary condition of affairs remains easy; the Bank of England has again this week declined to raise its discount rate above 3 per cent, and gold continues to flow in this direction. Notwithstanding the heavy crop movement West and South, it is generally believed that the supply of money this year will be sufficient to prevent any severe stringency.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 3 to 5 per cent, the average being 3½ p.c. To-day rates on call were 3 to 3½ p. c. Prime commercial paper is quoted at 51/2@61/4 p. c.

The Bank of England weekly statement on Thursday showed a decrease in specie of £386,000, and the percentage of reserve to liabilities was 37:55, against 38:06 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows an increase of 925,000 francs in gold and 175,000 francs in silver.

The New York Clearing House banks in their statement of Oct. 17 showe 1 an increase in the reserve held of \$4,487,300, and a surplus over the required reserve of \$9,029,700, against \$6,639,475 the previous week.

Foreign Exchange. - Sterling bills have been dull and firm most of the week, and the settlement of some sterling loans has probably kept rates stronger than they otherwise would have been. The gold imports since September 12 now amount to over \$20,000,000, and shipments from the other side still continue. Actual rates for exchange are: Bankers' sixty days sterling, 4 81@4 81¼; demand, 4 83¾ a 4 84; cables, 4 84¼@ 4 841/2.

Posted rates of leading bankers are as follows:

October 23.	Sixty Days.	Demand.		
Prime bankers' sterling bills on London Prime commercial Documentary commercial	4 80 #4 804	841274 85		
Paris bankers (francs). Amsterdam (gullders) bankers. Prankfort or Bremen (reichmarks)b'nkers	5 255 ₈ \$5 25 3 393 ₄ \$\alpha 3913 ₁₆	5 2212 75 217 40 7 40116 9518 7 9514		

The following were the rates of domestic exchange on New York at the undermentioned cities to-day: Savannah, buying ½ discount, selling ½ discount to par; New Orleans, commercial, \$1 50 discount; bank, 50c. per \$1,000 discount; Charleston, buying 3-16 @ ½ discount, selling par; St Louis, 75@ 90c. per \$1,000 discount; Chicago, 12½c. discount.

United States Bonds.—Governments steady. The closing prices at the N. Y. Board have been as follows:

" 16	810,000	130,000	\$0.9640	w	\$0.9645	
*Local purchases		343,000	\$	0	\$	
*Total in month to date		4,499,000	\$0.9640	0	\$0.975 C	

*The local purchases of each week are not reported till Monday of the following week.

State and Railroad Bonds.—Sales of State bonds this week include \$10,000 Ala, class B at 106¼; \$15,000 Tenn. settlt. 3s at 69¼-%; \$5,000 do 5s at 101; \$3,000 do 6s at 106; \$7,500 brown consols at 98.

3s at 69½-½; \$5,000 do 5s at 101; \$3,000 do 6s at 106; \$7,500 brown consols at 98.

There has been a much better market for bonds this week, and for the first time this season a decided inquiry for the low-priced mortgage bonds. This is a good sign, as it indicates investment buying and an inclination to place money where it will be relatively safe and pay a good interest. It is somewhat refreshing to bond brokers, after their long dull period, to see Atchison 4s at 84, Reading general 4s at 85, Hocking Valley 5s at 88, Mo. Kan. & Texas 4s at 79, Rio Grande Western 4s at 78, St. Louis & Southwestern 4s at 71, and some other mortgage bonds of similar grade picking up more or less. Income bonds have also been very strong on larger dealings, the Atchisons, Reading preferred, M. K. & T. seconds, Green Bay incomes, St. Louis & Southwestern 2ds and Texas & Pacific 2ds being most in demand. Northern Pacific consol. 5s, Chicago & Northern Pacific 5s and Oregon Improvement 5s have all been fairly active without much change in prices, and the Richmond Terminal 5s on active buying advanced to-day to 58%.

Railroad and Miscellaneous Stocks.—Stocks were dull

buying advanced to-day to 58%.

Railroad and Miscellaneous Stocks.—Stocks were dull early in the week, but have latterly been more active, with a strong tone. It has been one of the healthy signs in the recent stock movement to see the Vanderbilt dividend-paying stocks take a leading part in the advance, and now New York Central comes to the front with a rise to 114 on the prospect of an extra dividend for this year. The granger stocks are holding their prices well, and it is supposed that most of those roads will show still better earnings as soon as new corn begins to move. Missouri Pacific is in better demand since the company began to publish earnings, as they are showing a considerable increase over last year.

London has at times been a free buyer in our market, but at other times has sold some stocks, and there is no reason why sales to realize bandsome profits should not be made from that quarter as well as at home. Richmond Terminal was quite active this afternoon, selling up to 14¼, and it is presumed that insiders are buying for some good reason. Pitts. Cin, Chic, & St. Louis, among the less prominent stocks, advanced to 28%. At the close business was moderate and prices steady.

The unlisted stocks have been very dull. Silver buillion cer-

prices steady.

The unlisted stocks have been very dull. Silver bullion certificates inactive and down to 96.

Investment Kailroad Intelligence.

The Investors' Supplement, a pamphlet of 150 pages, contains extended tables of the Stocks and Bonds of Railroads, and other Companies, with remarks and statistics concerning the income, financial status, etc., of each Company. It is published on the last Saturday of every other month—viz., January, March, May, July, September and November, and is furnished without extra charge to all regular subscribers of the Chronicle. Extra copies are sold to subscribers of the Chronicle at 50 cents each, and to others at \$1 per copy.

The General Quotations of Stocks and Bonds, occupying to pages of the Chronicle, are published on the third Saturday of each month.

ANNUAL REPORTS.

Pullman's Palace Car Company.

(For the year ending July 31, 1891.)

(For the year ending July 31, 1891.)

President Pullman supplemented his annual report with the following general information:

During the fiscal year new contracts have been made with the following railroad companies: Monterey & Mexican Galf RR. Co., for a period of fifteen years; Chicago Peoria & St. Louis Railway, and Jacksonville Louisville & St. Louis Railway, comprising the Jacksonville Southeastern Line, for a period of twenty-five years. The contract with the Illinois Central RR. Co. has been changed for a new contract for a period of twenty-five years, this company purchasing the railroad company's interest in the cars owned under the previous contract.

contract.

contract.

There have been built during the year 191 sleeping, parlor and dining cars, costing \$3,079,693, or an average of \$16,124 per car. Orders have been placed at the company's works for 51 Pullman cars, the estimated cost being about \$16,500 each, or an aggregate of \$841,500.

The number of cars owned or controlled is 2,239, of which 1965 are standard and 274 townist or second-class cars.

The number of cars owned or controlled is 2,239, of which 1,965 are standard and 274 tourist or second-class cars.

The number of passengers carried during the year was 5,810,813; the number of miles run 186,829,836. During the previous year the number of passengers carried was 5,023,057, the number of miles run 177,033,116. The year just ended shows, therefore, an increase of about 6 per cent, both in the number of passengers carried and miles run.

The total mileage of railways covered by contracts for the operation of the cars of this company is 124,557 miles.

There has been added during the fiscal year to the company's investments in shops and plant, \$127,341. The value of manufactured product of the car works of the company for the year was \$11,906,977, and of other industries, including rentals, \$1,333,494, making a total of \$13,230,471, against \$10,213,658 for the previous year.

The earnings and income account compiled in the usual form for the CHRONICLE show the following:

Mobile & Ohio Railroad.

(For the year ending June 30, 1891.)

(For the year ending June 30, 1891.)

The report of Mr. J. C. Clarke, President, remarks that the gross revenue from all sources for the year ending June 30, 1891, subject to the lease agreement with the St. Louis & Cairo Railroad Company, amounted to \$3.275,330, against \$2,937.615 for the previous year. Of this 25 per cent of 150-640 went as rental to the St. Louis & Cairo, amounting to \$191,913 for 1890-91, against \$172.127 for 1889-90, being a surplus this year over the guaranteed rental of \$26,913, against a surplus of \$7.127 for the previous year. Other credits to income ac count not subject to lease agreement amounted to \$233,807, against \$235,786 for the previous year.

The average rates on the Mobile & Ohio Railroad decreased '036 of a cent, and on the St. Louis & Cairo Railroad '074 of a cent; but, owing to the increased tonnage and mileage, the ratio of expenses to earnings for the year has slightly decreased as compared with the preceding year.

The principal items charged in "operating expenses," on account of maintenance and improvement of equipment, roadway and track during 1890-91 amounted to \$448,969, against \$350,575 the previous year.

"New equipment and new construction" represents the

\$350,575 the previous year. "New equipment and new construction" represents the

"The interchange of business with connecting lines at terminal and junction points has been fairly satisfactory during the past year. Freight delivered the Mobile & Ohio Railroad at East St. Louis and Cairo destined to points in southeastern territory must be delivered at junction points to lines that enter into active competition for the control of this business at points of origination; this has a tendency to prevent our controlling a greater proportion of this traffic. The decrease in the average freight rate for the whole line for the current

year was 46-100 of one mill per ton per mile. Small as this reduction seems, if we could have secured the same rate as for last year, it would have made a difference in our net earnings of more than \$139.000."

The following statistics of earnings, expenses, & ..., have been compiled for the CHRONICLE:

Cincinnati New Orleans & Texas Pacific Railway.

(For the year ending June 30, 1891.)

The report of the President, Mr. S. M. Felton, remarks that the expenses of conducting transportation increased \$195,349, or 20'33 per cent, over the previous year, and the principal items of increase were agents and clerks, conductors, brakemen and baggagemen, switchmen and yardmen, station labor, clearing agents and expenses fraight car mileage. sleeping cars (mileage and expenses), freight car mileage, train expenses, loss and damage to freight. The increase is due to an increase in train mileage of 8.94 per cent and to a general increase in wages of train and yardmen, made early

general increase in wages of train and yardmen, made early in the year.

The motive power expenses increased \$116.748, or 17·19 per cent, as compared with the previous year.

The maintenance of cars increased \$88,107, or 15·56 per cent. The total expendures on this account were \$481.811, a decrease of \$65,921, or 12·04 per cent, owing mainly to the very large amount of work done on this account the previous year.

The tonnage was 2.004,418, an increase of \$1,112, or 4·22 per cent. The number of tons carried one mile was 354,572,982,

The tonnage was 2.004.418, an increase of 81,112, or 4.22 per cent. The number of tons carried one mile was 354,572,982, an increase of 21,699,595, or 6.52 per cent. Of the total tonnage carried 1,083,482, or 54.05 per cent, was through, 920,986, or 45.95 per cent, local. The revenue per ton per mile was 88, against 92 the previous year; the decrease being caused by the transportation of a larger proportion of low-class freight. The number of passengers carried during the year was 896,255, an increase of 82,403, or 10.12 per cent. The number of passengers moved one mile was 42,324,514, a decrease of 342,376, or 80 per cent. The earnings per passenger mile increased from 2.25 cents to 2.34 cents, or 4 per cent. Of the Cincinnati Southern Railroad lease the report says: "The first ten years of the lease will expire on October 11th, 1891. For the five years from that date the rental to be paid by your company to the city of Cincinnati will be at the rate of \$1,000,000 per annum, instead of \$900,000 per annum paid for the past five years and \$800,000 per annum for the preceding five years. * * * "After careful consideration of the su' ject, your Board is of

was disposed of as follows: \$80,000 being paid in dividends, \$179,828 for improvements and additions to the property which will revert to the city at the expiration of the lease, and are considered a part of the rental; \$90,680 for capital expenditures, which embrace additional rolling stock, tools, machinery and other property to which your company retains title. In addition to this, \$100,576 has been credited to the sinking fund, leaving a balance of \$11,381." * * * * "The terminal expenses in Cincinnati during the fiscal year, occasioned by the want of sufficient depot and yard accommodation, were \$133,506. The expenditures by your company arising from the failure of the city to comply under this heading with the requirements of the lease now exceed the sum of \$970,000. As stated in the report for 1886 your Board is of opinion (and in this it is sustained by eminent counsel who have examined the case) that this claim is a just and valid one against the city; that it will be awarded under arbitration, and when so awarded can be enforced against the city or be deducted from the current rental payments. I regret to report that all negotiations with the Trustees of the Cincinnati Southern Railway and the Sinking Fund Commissioners of the city of Cincinnati, for the extension of the lease, have failed."

Toledo & Ohio Central Railway.

Toledo & Ohio Central Railway.

(For the year ending June 30, 1891.)

The report of the President, Mr. Stevenson Burke, states that the gross earnings were \$1,501,822, as against \$1,388,749 last year. The operating expenses \$999,834. against \$809,636 last year, giving a result of net earnings \$501.938, as against \$579,112 last year. The tonnage moved was increased 205,274 tons, and the tonnage moved one mile was increased \$13,671,677 tons. The road has required heavy expenditure to bring it up to the state and condition which the interests of the owners require. The only fund available for this purpose is the regular income of the property from operation. A reference to the report of the Auditor will show that the increase in betterments charged to operating expenses more than accounts for the shrinkage in net earnings during the part year. The property has been very much improved during the past year. New iron bridges have been constructed, much masonry in the way of culverts and otherwise has been constructed, and the filling of trestles has been continued.

The CHRONICLE obtained very early figures of earnings and

The CHRONICLE obtained very early figures of earnings and income account for this company, and published them in the i-sue of August 8 on page 186. The balance sheet is as follows:

* In 1889-90 $\S262.116$ was spent for new equipment, improvements, &c., leaving *65 surplus; in 1890-91 were so spent $\S117,137$, leaving a surplus of $\S5,144$.

Ohio Valley Railway.

(For the year ending June 39, 1891.)

The annual report makes this statement: "The Chesa-peake Ohio & Southwestern Railroad Company having ac-quired control of the Ohio Valley Railway, this property will

be operated in close connection with that system, and as a division of the "Mississippi Valley Route," forming the shortest route between Evansville, Ind., Memphis, Tenn., New Orleans, and all other southwestern points. The general consolidated and first mortgage bonds of this company to the solidated and first mortgage bonds of this company to the amount of \$2,162,600, with interest subsequent to January 1, 1891, have been, or will be guaranteed by the Chesapeake Ohio & South-western Railroad Company, but the organization of the Ohio Valley Railway Company is to be maintained and the road operated as a separate and distinct property, so that all benefits from increased business, the improvement of property and the development of local traffic, will inure to the benefit of the stockholders."

Elgin Joliet & Eastern Railway Company.

(For the year ending June 30, 1891.)

The first annual report of this company, Mr. Samuel Spencer, President, has just been issued, and shows the following earnings and expenses for two years ending June 30:

Gross carnings	1890, \$459,172 317,013	1891. \$631,281 435,448
Net earnings	\$142,159	\$195,833 Miles.
For the year 1890 there were in operation for For 6 mosths (Spaulding to Waukegan)	12 months	130°93
Total	peration	166.53

When the construction of the several portions of the road was decided upon a reserve fund was created in each case to pay interest during and after construction, as follows:

This fund has answered the purposes for which it was intended—of providing for interest during construction and of supplementing the net earnings during the infancy of the enterprise to such an extent as to enable the company without borrowing to meet regularly the interest on its bonds up to the time when it was expected that the net earnings would be sufficient for this purpose. The result has been as follows:

Net earnings fo the year ended June 30, 1889 (Deficit) Net earnings for the year ended June 30, 1890 Net earnings for the year ended June 30, 1891	6,639
Total	\$352,028 280,000
Total available for interest	\$632.028

Net earnings prior to June 30, 1888

"The roadbed, equipment and all other properties of the company have not only been thoroughly maintained but substantially improved during the year, the policy being to keep them in such condition at all times as to serve amply the wants of all local industries tributary to its lines and to perform any work which may be thrown upon them by connections."

GENERAL INVESTMENT NEWS.

Atlantic & Pacific.—Notice is given to holders of the Atlantic & Pacific Railroad Company's Central Division first mortgage 6 per cent bonds (§1,189,000) due November 1, 1891, that they can present their bonds for payment at the offices of this company in Boston, or Baring, Magoun & Co., 15 Wall Street, New York, on and after November 1 prox. Holders are also notified that they have the option until November 10 proximo of accepting in exchange for their bonds at par, with cash bonus of 25 per cent, Atlantic & Pacific Railroad Company's trust 4 per cent gold bonds, guaranteed by the Atchison Topeka & Santa Fe and St. Louis & San Francisco railway companies, principal of which is due January 1, 1937. Particulars are given in the advertisement on another page.

Baltimore & Ohlo.—At the monthly meeting of directors in Baltimore on the 21st, the Finance Committee did not consider the question of a dividend on the common stock, but determined to act upon the matter at its meeting on the second Monday in November, when the result of the year's business will be accurately known. The summary of the entire system east and west of the Ohio River gives the earnings for the fiscal year ended Sept. 30 at \$24,519,798, increase \$93,702; expenses \$17,059,589, increase \$92,719; net increase \$5.983.

Brooklyn Surface Rallroads.—The following are for the year ending June 30, as reported to the New York Railroad Commissioners:

Central Pacific.—There have been canceled this year from proceeds of land sales \$694,000 of the land grant extended 5s, reducing the amount now outstanding to \$3.564,000.

5s, reducing the amount now outstanding to \$3.564,000.

Chesapeake & Ohio.—At Richmond, Va., October 20, the Chesapeake & Ohio Railroad Company held its annual meeting. President Ingall's annual report was published in the CHRONICLE of October 3. The following board was elected: William P. Anderson, Cincinnati; D. Axtell, Richmond; George T. Bliss, C. H. Coster, Charles D. Dickey, Jr., C. P. Hunnington, New York; M. E. Ingalls, Cincinnati; Samuel Spencer, New York: Henry T. Wickham, Richmond.

Spencer, New York: Henry T. Wickham, Richmond.

Columbus Shawnee & Hocking.—At the annual meeting of the Columbus Shawnee & Hocking Railroad Company at Columbus on the 19th inst., the directors were authorized to perfect arrangements for leasing the Sandusky & Columbus Lake Erie & Southern Short Line, now in process of construction, from Sandusky south by direct line to Columbus, 108 miles. The new route will be, when completed, the shortest and most direct between Central Ohio and the great lakes. The following board of directors was elected: P. W. Huntington, Columbus, President; F. J. Picard, Columbus, Vice-President and General Manager; W. E. Guerin, Columbus, Secretary and General Solietor; H. B. Turney, Columbus, Treasurer; Chase Andrews, Zanesville; D. B. Hatch and H. W. Putnam, New York; D. S. Gray, Charles Parratt, G. C. Hoover and Samuel Huston, Columbus.

Comstock Tunnel (Sutro).—The contract has been closed

C. Hoover and Samuel Huston, Commous.

Comstock Tunnel (Sutro).—The contract has been closed for running a drift to the Occidental Mine through the Brunswick lode, and other contracts have been made with the consolidated California & Virginia Co., Hale & Norcross and the Savage Mining Co. for the transportation of waste rock, debris and ore. These contracts were alluded to in the annual report, and work under them has begun. The revenue derived from these sources will be in addition to the royalty paid to the company.

paid to the company.

Denver & Rio Grande.—At Denver, Oct, 20, the annual meeting of stockholders was held. The following were elected directors: George Coppell, R. T. Wilson, Adolph Engler, W. Mertens and C. C. Beaman, of New York; J. Lowber Welsh and Edmond Smith, of Philadelphia, and Edward T. Jeffrey and Edward O. Wolcott, of Denver. The largest representation of stock ever held at any meeting was present, namely, 86½ per cent, or 583,856 shares out of a total issue of 6:6,500 shares. The meeting was harmonious and the votes were unanimously cast for the new directory. The annual report of the company was submitted to the meeting; a full abstract of it was published some time since in the Chronicle, in the issue of Sept. 26.

International & Great Northern.—The stockholders' proposition, given in our last issue, should have said in reference to the second mortgage that it is to be left undisturbed, the bondholders retaining their bonds, but agreeing to a reduction of interest to 4½ per cent per annum for the first six years and thereafter 5 per cent. The unpaid coupons on the second mortgage bonds it is proposed to pay in 4 per cent 30-year income bonds, which will also be given to Mr. Gould for his judgment and for the cash he will advance to meet the requirements of the reorganization plan. The position of the two committees representing the bondholders is to proceed with the foreclosure. At Paris, Texas, on the 19th inst., in the Federal Court, on the application of the bondholders, Messrs. I. H. Evans and O. J. Lyon were appointed receivers. This action was taken pending the possible discharge of the State receivers by the Court sitting at Tyler, before whom the case calne up on the 21st inst. As the Gould judgment obtained in the State Court has not been satisfied, owing to the failure of the several interests to come to an agreement, the situation as regards the receivers is not likely to be

changed at present, and the State Court has declined to dis charge its receivers, according to latest despatches.

charge its receivers, according to latest despatches.

Lake Erie & Western.—This company has executed to the Central Trust Company of this city and Robert C. Bell of Fort Wayne, Ind., as trustees, a trust deed, or mortgage, to secure second mortgage bonds not exceeding \$5,000 per mile. The instrument bears date of June 30 and covers the property of the railroad, 725 miles, including roadbed and all other property appertaining to the lines. The company is to execute its bonds for \$1,000 each, to bear date June 30, 1891, and to be payable July 1, 1941, in gold coin of the present weight and fineness, with interest at 5 per cent from July 1, 1891, payable semi-annually Jan. 1 and July 1, the bonds to be issued at the rate of not to exceed \$5,600 for each mile of the lines described. This mortgage is to be subject to the first mortgage dated Feb. 21, 1887. The aggregate of bonds to be elvivered is \$3,625,000. There has been some complaint among buyers of the stock that no intimation was given of this issue of bonds.

National Lead Trust.—A circular to the National Lead Trust certificate-holders announces that a majority in number and value of the certificate holders having become parties to the agreement of reorganization, the time for the deposit of National Lead Trust certificates to be exchanged for new certificates is limited to and includes December 1, 1891. As soon as practicable thereafter certificates of stock of the National Lead Company of New Jersey, the name of the reorganized company, will be ready for delivery in exchange for certificates of deposit, as provided in the reorganization agreement. If a sufficiently unanimous deposit shall be made to justify the prompt completion of the reorganization, the reorganizing trustees expect to be able to pay to holders of their certificates of deposit, under the reorganizing agreement, a sum equal to 30 cents upon each share of Lead Trust represented by the certificates of deposit, this sum to be paid simultaneously with the exchange of certificates of deposit for stock in the National Lead Company.

New Bonds and Stocks Authorized,—This item is published to-day on page 608.

New York Cen'ral.—The Executive Committee of the board of directors of the New York Central have decided to recommend in December an increase of the regular quarterly dividend on the common stock, which is now one per cent, or four per cent per annum.

New York New Haven & Hartford.—At the annual meeting in Hartford President Clark explained concerning the Long Wharf property. He said that the property was owned by thirty to forty people, most of whom had agreed to take the railroad stock in exchange for the wharf stock, on the basis of one share of wharf stock for four shares of railroad stock. Some, however, did not want the railroad stock, and about 250 shares were sold to furnish the necessary cash. The railroad stock exchanged and sold was upon the following basis:

																		\$189,000
	shares

New York Pennsylvania & Chio.—The annual meeting of stockholders of this road, operated under lease by the New York Lake Erie & Western Railroad, and forming a part of the Erie system, was held at the Erie offices in this city on Wednesday. The old board of directors was re-elected. President Chas. E. Whitehead, in his annual report, states that the earnings of the past year were very good, although showing a slight decrease. The gross earnings for the year were \$7,10,1067, or \$188,000 less than last year. The decrease is said to be chiefly owing to the falling off of the transportation of coal. The physical condition of the road is improved, and this, with the good order of the equipment, has enabled the operators to handle a large amount of through business. Extensive improvements in the way of terminal facilities in Cleveland have been added, and the actual capacity of the iron ore docks has thus been materially increased. Nearly every matter of difference between the company and the lessees of the road have been adjusted to the entire satisfaction of both, and the best of feeling prevails.

Norfolk & Western.—President Kimball says: "Work on

Norfolk & Western.—President Kimball says: "Work on all the extensions of the road will be pushed forward with greater vigor than ever. By Dec. I sixty miles of track on the Ohio extension will be completed to the bridge now being built across the Ohio River, and regular trains will be running to Columbus. The entire Ohio extension will be done by next July, opening up the Pocahontas coke and coal regions to the West. The business of the road is growing so rapidly that it is difficult to provide cars fast enough. During the present season the Norfolk & Western has hauled from the Clinch Valley extension to tidewater a million bushels of wheat for export. This is an entirely new business, as the road did not handle a bushel of wheat for export last year."

Northern Pacific.—At Fargo, North Dakota, on the 14th inst., Judge Caldwell in the U. S. Circuit Court rendered a decision holding the Northern Pacific liable for the taxes on certain lands. It appears, however, that although on the main issue, as to the taxation of lands, the decision is against the company, it gives them a clear title to all the lands within their grant not known to contain minerals at the time of the filing of the map of the definite location of the road. The Interior Department has hitherto refused to patent these lands until the railroad should produce proof that the lands did not contain minerals. Many thousands of acres of land in Montana, Idaho and Washington upon which gold, silver and copper, etc., have been discovered since the filing of the map and the location of which the Interior Department has held was not included in the grant, are by Judge Caldwell's decision declared to be the property of the railroad. "Not only the land, but minerals as well." The value of railroad taxes involved in Judge Caldwell's decision, for twelve counties interested, will be about \$100,000.

Mr. James McNaught, Counsel for the Northern Pacific Company in New York, said in regard to this decision:

"It also holds that the grant to the company is one of quantity and that the indemnity lands as well as the place lands were grantel, and that the company has at this time a title in fee simple to the indemnity lands without reference to whether the Interior Department has approved the selections tions.

This decision is of great value to the company, not only in "This decision is of great value to the company, not only in consequence of its bearing on the mineral land proposition, but also as settling and fixing the title of its in-lemnity lands. It places that title beyond any arbitrary ruling or decision of the Interior Department. The question of its value in dollars cannot be definitely answered now. Additional valuable mineral claims are being discovered every day in the grant. Sections of the country known to be mineral have not all been surveye I and it will be a number of years before the full value of these decisions can be ascertained.

"The original case of Northern Pacific vs. Barden has been appealed to the United States Supreme Court. The Supreme

appealed to the United States Supreme Court. The Supreme Court, however, during its last term in a similar case, decided the same way, and we therefore regard the question as substantially settled."

HIGHEST AND LOWEST PRICES OF LEADING STOCKS AND INCOME BONDS FOR TWELVE YEARS.

There has been much interest manifested in stock fluctuations ever since the beginning of that important upward m ovement which started in August last. For this reason it seemed desirable to compile and present to our readers a table showing the actual highest and lowest prices reached by a large number of prominent stocks in each of the past twelve years.

There is no disputing the logic of Stock Exchange prices, and whatever the talk may be about the value of this property or that, it all comes down eventually to a question of market price, which really forms the conclusion of the whole argument. Hence the best practical history of the stock market for a series of years is found in the range of prices, and having these figures before us as the central point of observation, we may throw around them any amount of explanation and historical environment in the way of remarks upon the financial situation, the crops, the money market, the panics, the London embarrassments, &c., &c.

The period covered by these twelve years runs back to within one year of the resumption of specie payments by the Government, on January 1, 1879; it also embraces two notable stock panies, that of Grant & Ward in May, 1884, and the Barings' crisis in November, 1890. Quite a number of the companies, too, whose stocks are embraced in this list have been entirely reorganized during this period.

Reports and Documents.

COTTON MOVEMENT AND FLUCTUATIONS

Messrs. Latham, Alexander & Co., bankers and commission merchants, No. 14 Wall Street, have just issued their annual book on cotton (the eighteenth yearly issue), from which important extracts are quoted below. The address of the firm to their customers gives at some length their views of the cotton trade; and an elaborate letter from Messrs. Ellison & Co., of Liverpool, written expressly for this publication, reviews quite thoroughly the history of the European situation during the past cotton year, and indicates the prospects for the future.

Messrs. Latham, Alexander & Co. address their friends and patrons as follows:

NEW YORK, Oct. 1, 1891.

DEAR SIR-The season of 1890-91, because it has been un-commonly eventful, will long survive in the history of the cotton trade.

Events of paramount importance occurred which have affected alike the planter, the picker and the manufacturer.

The grand total of the American crop, values of exports and other interesting facts we give as follows:

Total crop of United Statesbales.8,6	352,597
Total value of crop	92,047
Total value of American consumption\$127,1	170.873
Cents.	Pence.
Average price of middling uplands in New York and	
Liverpool 1890-91 9.03	4.24
Average price of middling uplands in New York and .	
Liverpool 1889-9011:53	5.97

The crop of the United States for the season just closed shows an excess over that for 1889-90 of 1,345,316 bales.

This phenomenal increase over a yield which only a year ago

was the heaviest on record is susceptible of but one explana-

The farmer elated over the gratifying returns for his product in 1889-90 determined to extend his area to its utmost capacity ander cotton cultivation. The result has therefore been that, favored by a propitious season for picking, a crop was marketed which was altogether disproportionate to the wants of the world, and the raw material has sold at a price the lowest within the memory of most of us.

within the memory of most of us.

Although the responsibility for this state of affairs rests of course mainly with the farmer, yet the year past has been extremely prolitic of events which independently have exercised a depressing influence on the value of the staple product of the South. What those events have been it is our purpose in the following pages to partially and cursorily describe.

The season opened with spots (quoted at 11 cents) and contracts (November, 10·30; January, 10·35; March, 10·40), at such prices as had they been maintained would have guaranteed to the planter a handsome return. But it was not to be. Under the combined influence of the suspension of the leading operator at Liverpoot, large receipts and cheerful crop reports, the first week witnessed a fall in prices which was the commencement of that decline which, with but few interruptions, did not complete its downward course until August contracts sold at 7·46 in July and spots at 7·15-16 in August of the followsold at 7.46 in July and spots at 7.15-16 in August of the follow

ng year. Whatever foundations unfavorable weather reports established upon which a bull movement might have been inaugurated, they were speedily buried out of sight by the unusual dimensions of the receipts at the ports and by the accounts of clearing weather at the South. By this time, too, the truth

clearing weather at the South. By this time, too, the truth was ascertained that though parts of the crop in certain sections of the cotton belt had been seriously damaged, still they had not been destroyed; that though the quality had been impaired the quantity had not been reduced.

As the elson progressed statistics began to foreshadow the outlines of that prodigious movement before which the price of cotton was to melt away like snow under the noonday sun. Holders at the primary points betrayed considerable anxiety in their desire and efforts to dispose of their cotton at or even under current rates, and aided by the growing gloomy aspect of financial affairs on both sides of the Atlantic, supplemented by the growing popularity of maximum estimates, the value of cotton broke down completely, and November contracts sold at 9 cents, a figure which the bears had all along predicted. Instead of monetary matters assuming a brighter aspect they

som at scents, a ngure which the bears had all along predicted.

Instead of monetary matters assuming a brighter aspect they grew more alarming until the crisis was reached in the stranding of the historic house of Baring Bros. & Co., resulting in the complete collapse of commercial credit and the advancement of the Bank of England rate of discount to the minimum of 6 per cent, actual discounts being granted at 7 and 8 per cent.

cent.

The closeness of the relations which the Barings held with corporations in this country created lively apprehensions of financial disturbance over here, and the banks, determined on a course of self-preservation, adopted a policy so conservative, cautions and circumspect that at last, when the negotiation of foreign exchange with bills of lading attached was rendered extremely difficult, if not impossible, the demoralization that ensued naturally checked all trading in cotton for export and hampered business in all lines in any way depending on the marketing of the crop.

In fact, the transaction of all business was seriously embarrassed and suggestative enterprise was completely suspended.

rassed and spectrative enterprise was completely suspended.

In the closing week of the year March contracts fluctuated between 9·15 and 9·40; May, 9·40-9·65; July, 9·59-9·84, and spots were quoted at 9 3·16-9 5·16 cts. Hitherto, it may have been observed, the general course of the market had been toward a lower level of prices.

The new year opens under auspices more distinctly favorable than had existed for some time previous.

The movement of the crop, though large, had been relatively small, and began to show some signs of abatement—so much so indeed that maximum estimates were generally abandoned. Spinners here and abroad operated with less timidity, and the nearer prices declined toward the cost of production the more

nearer prices declined toward the cost of production the more nervous the bears became. But early in February credence was given to rumors that the planters were holding back their

was given to rumors that the planters were holding back their cotton and maximum estimates were again entertained. Stress was now laid on the statistical position, in which the visible supply was shown to exceed that of last year for the same period by 475,000 bales. Under the influence of these features there was a severe fall in the price of contracts, May selling at 9.04 and August 9.20 and 9.21 respectively, which figures were further scaled, owing to dull trade at Manchester and large port receipts, to 8.79, 8.98 and 9.11 for the months. and large port receipts, to 8.79, 8.98 and 9.01 for the months before mentioned.

The bulls now made most of the argument that at the then ruling prices curtailment of cotton acreage was inevitable, and furthermore they insisted that the planting season was late. But the force of these arguments was more apparent than real, for after an advance of nearly a quarter of a cent, upon favorable accounts of better weather for field and planting operations, July and August fell to 8.92 and 8.98 at the beginning of April.

Speculation then lapsed into a moribund condition, out of which it revived the middle of April, to force the price to 8 61 and 8 68. A perfect avalanche of cotton deluged the South, sweeping away with irresistible force every argument that the bulls could offer in favor of higher rates.

Prices now looked attractive, and it was natural to sup-pose that the lowest prices of the season had at last been

reached.

The bears covered their contracts, and, assisted by fresh buy-The bears covered their contracts, and, assisted by fresh buyers, a reaction followed, and August sold up to 9 cents again. In June, however, the CHRONICLE and Department of Agriculture united in representing that there had been some reduction in cotton acreage, and that generally the conditions were less favorable than at the same date the year before. This was a sore disappointment to the bulls, who had expected and relied on a more unfavorable report. A stampede followed; the bulls relinguished their cotton with such vigor that

August sold down to 8 45 and a little later to 8 04.

For the rest of the season fluctuations were caused by reports of the weather from the planting regions, which affected the market according as they were construed to be favorable or otherwise. But it must be mentioned that on July 28, upon glowing accounts of favorable conditions for the growing crops and upon the receipt of weak cables from Liverpool, August finally sold down to 7.46, the lowest price for contracts during the season.

the season.

The season of 1891-92 begins with the world's visible supply

The season of 1891-92 begins with the world's visible supply of cotton about 600,000 bales in excess of what it was this time last year. The question is, what effect has this large increase last year. The question is, what effect has this large increase had in curtailing the acreage planted for the coming crop.

Our own inquiries lead us to believe that there has been 2

very material reduction.

our own inquiries lead us to believe that there has been a very material reduction.

The Chronicle's investigations, expressed in numbers, shows a decrease, though a small one, at the same time asserting that "the promise is that we shall have a 'good' crop; there is, however, a chance that we shall have a 'poor' crop, but there is no possibility of our having a 'full' crop."

In the light of these inquiries, taking into consideration the ravages of worms and the destruction of parts of the crop from other well-known causes, desiring to be as consistent and conservative as the existing conditions will permit, our estimate of the prospective crop is 7,500,000 bales.

In conclusion we cannot omit to call attention to the admonitions that in the past we have repeatedly addressed to our friends, the farmers, in regard to the folly of overproducing the staple and thereby depressing its value almost to the cost of production point, and neglecting to raise such cereal crops as wheat and corn.

The past season has illustrated in a forcible manner that very state of affairs, which we have all along tried to induce the

state of affairs, which we have all along tried to induce the farmer to avoid begetting. To the most unreflecting it must be plain that the persistence in a policy which tends to keep the value of cotton by overproduction at about what it costs to raise, and to oblige the paying of \$1.75 for corn, must termi-nate sooner or later in disastrous consequences. Unless the farmer resolves to invest less of his capital in

cotton and more in breadstuffs, unless he resolves to keep the limits of his acreage in cotton more in conformity with the requirements of the times, he cannot reasonably expect that amelioration in his financial condition which the producer of an article of such universal consumption as cotton should en-joy. Unlike other produce, its cultivation is limited to certain latitudes, and is incapable of being indefinitely extended ex-cept in the purlieus of these latitudes. Competition is therecept in the purificus of these latitudes. Competition is there-fore confined amongst Southern farmers themselves, who, because they are unable to consume all they raise, are depend-ent upon foreign nations to buy their surplus; and if such surplus more than supplies these nations' wants, the result is the markets of the world become overstocked and the whole crop is depressed beyond its intrinsic value, when it is no longer a money crop. longer a money crop.

The European spinner prefers American cotton when he can get it, and is willing to pay a premium to obtain it. If on account of its scarcity or relative dearness he uses other growths, he does so under compulsion. To us, therefore, it seems that the farmer has the shaping of his own destinies more in his own hands than one would think he believes he has. It behooves him to become a student of the industrial world, to extend the range of his vision beyond the confines of his own plantation. If he will do this, we do not doubt that in the future he will become more and more independent, and share in a greater degree the prosperity of the most progressive section of that country which is to-day the wonprogressive section of that country which is to-day the world. Again availing ourselves of this opportunity to present our compliments to our friends in all sections of the South,

We remain obediently yours,

LATHAM, ALEXANDER & CO.

LETTER FROM ELLISON & CO., LIVERPOOL.

(WRITTEN EXPRESSLY FOR THIS BOOK).

LIVERPOOL, September 12, 1891.

Messrs. Latham, Alexander & Co., New York.

DEAR SIES—Although the past season cannot be said to have been altogether uneventful, there have been no exciting episodes, such as were witnessed in connection with the "squeezes" and "corners" of the previous two seasons. The course of prices during the first ten months was, with slight fluctuations, constantly downwards, owing to the combined influence of the ever-increasing developments of the American crop and of the simultaneously diminishing volume of busi-ness in Manchester, aggravated at the outset and for several months after, by financial uneasiness and the interruption of months after, ty financial uneasiness and the interruption of exchange operations; and in the sequel, by temporarily overloaded markets for both the 'raw material and the manufactured article; and by the advent of an universally bearish sentiment which carried everything before it, in consequence of the current depressing surroundings and the apparently hopeless future of the trade. The "bears" attained as firm a grip of the market as the "bulls" had secured in the previous two seasons, and prices were driven as unjustifiably low as they had last year and the year before been forced unjustifiably high. The check to the downward movement came at the end of July, at which date it became apparent that both spinners and speculators were heavily "short"; and since then prices have steadily advanced, owing to the efforts of the "bears" to cover and to the uneasiness occasioned by the unfavorable character of the news received about the condition of the new crop: the upshot is a rise of \(\frac{5}{6} \)d. to 17-16d. —leaving prices still \(\frac{3}{6} \)d. to 17-6d. below the rates of twelve months ago.

fall of 13dd. to 17-16d.—leaving prices still 4d. to 13d. below the rates of twelve months ago.

The season opened with middling at 5%d. for spots, 55%d. for the current month's delivery. These prices sho wed a decline of about 1d. per lb. from the top rates paid in August. There was naturally a little more business doing at the decline, but with favorable crop advices and unprecedentedly heavy receipts, there was no disposition to buy for the rise; and throughout the month of October prices gradually eased off. The depression was further intensified in November by the adverse turn taken by financial affairs. On the 7th, the Bank of England rate of discount was unexpectedly raised to 6 per cent, and the state of things on the Stock Exchanges of London and New York began to assume a very threatening apearance.

earance. Instance, to a sequence was a very uneasy feeling in cotton circles on both sides of the Atlantic, especially as increased estimates of the crop began to be put forth, and on the 19th middling was selling at 5 3-16d, for spots and 5 3-544, for November delivery. The news respecting the assistance given to the ber delivery. The news respecting the assistance given to the eminent house of Mesars. Baring Bros, had a very depressing influence and caused people to fear that, although a great crash had been averted, monetary troubles of less important magnitude might be experienced. The near approach to 5d. per lb. and diminished crop movements attracted buyers, but continued misgivings as to financial matters prevented any improvement in value, and on the 1st of December middling was at 51/4d. for spots and 51-32d, for the current month's delivery. Distant cotton however was at a premium. August. was at 51/3d. for spots and 5 1-32.1. for the current month's deivery. Distant cotton, however, was at a premium, August-September being quoted 5 5-16d. per lb. In the month of December there was a slight recovery between the 1st and the 10th, spots rising to 5 3-16d. and near deliveries to 5 11-64d.; but thence to the 23d there was a falling back to 51/3d. and 5 1-64d. respectively, in consequence of lower price from America and increased crop movements. Once more buyers, influenced by the idea that prices were at a safe level, again came to the rescue, and the month closed with spots at 5.3-16d. and December-Lanuary delivery at within one point 5 3-16d, and December-January delivery at within one point

of 5½d.

The new year opened hopefully. There was a sharp rise in values at New York, and with an excellent demand prices between the 1st and 9th of the month gained ½d. for spots and 6 to 11 points for futures. The crop movements were not large, and though people talked of 8,000,000 bales, no one sincerely contemplated much higher figures; but with increased movements, estimates as high as 8,250,000 to 8,355,000 bezzy

to be put forth as possible of attainment. Simultaneously, business in Manchester became very quiet, so much so that the sale of yarn and goods fell behind the rate of production. The upshot was a general loss of confidence and a decline of \(^3\){d}d, per lb. in spots and one of \(^3\){d}d, to 7-16d, in futures between the 9th of January and the 7th of February. During the subsequent week there was a slight reaction, owing to less santween the 9th of January and the 7th of February. During the subsequent week there was a slight reaction, owing to less sanguine views about the crop; but thence to the 7th of March, with weak prices at New York and the South, heavy receipts and the threat of excessive supplies for the balance of the season, prices again gave way until spots were quoted 4 13-16d. near deliveries 4.46d. and September futures 4.61d. The fact that values had fallen almost to the lowest level touched for a generation again brought in buyers; and, with reports of the backward condition of the preparation for the new crop, prices between March 7th and 18th gained ½d. per lb. for both spots and futures. But with renewed heaviness in Manchester and continued large receipts at the American ports, the improvement was more than lost, and on the 21st April, middling was at 411-16d. for spots and at 49-16d. for the current month's delivery. Once more the notion that prices had at last touched the bottom led to a better demand, which resulted in an advance of ½d. for spots and nearly ½d. per lb. for futures. There was more animation also in Manchester, and people began to think that the worst was over; and that henceforth any fall that might take place would only be slight in extent and temporary in duration. This was on May 7th, but the inclination to take a cheerful view of the future was not backed up by any sustained support from consumers, while improved accounts about the progress of the new crop.

in extent and temporary in duration. This was on May 7th, but the inclination to take a cheerful view of the future was not backed up by any sustained support from consumers, while improved accounts about the progress of the new crop raised visions of a possible glut of supplies. This state of things thoroughly disheartened the "bulls" and threw the market as completely into the hands of the "bears" as it had twelve months previously been in the grasp of their natural enemies. The result was that with slight interruptions the market, hammered by the "shorts," weakened by impoverished "longs" and neglected by spinners, sank into a condition of absolute demoralization; and prices between the 7th of May and the 29th of July lost ½d. per lb, for spots and %d. to 34d. per lb, for futures, middling selling at 4-5-16d. for spots and only one point over 4-3-16d. for July delivery and two points over the same figure for September delivery.

These prices had not been touched since 1848—the year of political revolutions on the Continent and of commercial dislocation everywhere. Nevertheless, the talk was that the decline would not stop on this side of 4d. "Bulls" sold out and became "bears" and spinners sold "short," as if they could evolve yarn out of their inner consciousness. The result was the creation of enormous "bear" interest. We pointed out the danger of this course at the time, and we held that even at 4½d. selling "short" was more hazardous than wise, though prices might temporarily be driven lower. The last ½d. decline was absolutely unjustified by the facts of the situation, and was the result of that species of insane panic which occasionally runs riot on 'Change—sometimes in cotton and sometimes in other departments of business. During the closing days of July and the first week of August there were indications that all the weak "bulls" had sold out, and that spinners and speculators who had sold "short" were becoming nervous. Moreover, the low prices were attracting the attention of outsiders. The attempt ers. This only made the "shorts" and consumers more anxious to buy, and the upshot was that between the 29th of July and the 8th of August prices advanced ½4. for spots and 17 to 18 points for futures. During the subsequent four weeks, with an extensive demand from spinners, to cover the considerable business doing or done in Manchester, and with eager buying by speculators to cover "shorts" or to go "long," prices, with the usual slight fluctuations, gradually advanced conding in a rise (between August 8 and Sentember 7, of prices, with the usual slight fluctuations, gradually advanced—ending in a rise (between August 8 and September 7) of 5-16.1, for spots and 27 points for near futures. Middling was now quoted at 4% on the spot and the same price for September delivery. The confidence of operators was strengthened by less favorable reports about the crop, but these had less influence than the improved state of business in Manchester, indicated by the large purchases of the raw material, and the growing conviction that aside altogether from the crop prospects prices had been forced unduly low. After a rise of 9-16d, for spots and almost 11-16d, for futures from the previous lowest point, there was, very naturally, a pause, especially brospets prices and almost 11-16d. for futures from the previous lowest point, there was, very naturally, a pause, especially as though near cotton was still only at 4\footnote{3}d., June-July was selling at 5-5-16d., making August-September worth 5\footnote{3}d.; and particularly as even the most sanguine "bull" had not ventured to look for more than 5\footnote{4}d. as the eventual top of the market. The result of this reflective mood was that between the opening of the 7th and the morning of the 9th there was a reaction of about 7 points. The receipt of unfavorable crop advices caused a rebound of 5 to 7 points before the close of the last-named day, but the improvement was lost on the 10th in consequence of the receipt of telegrams from New York stating that the forthcoming Bureau report would be better than expected. As the report, however, proved to be an unfavorable one, though not so bad as the bogus pointers previously circulated for manipulating purposes, the market became very strong, especially as spinners continued large buyers of both spots and futures; and the result is that prizes are to-day (Sept. 12th) almost back to the highest rates touched to-day (Sept. 12th) almost back to the highest rates touched on the 7th, with the tendency still upwards.

The principal fluctuations in spots and futures, during the

sesson, compare as follows:

1890	Spot.	Futures. Current Month. d.	Spot.
October 1	53	5:40	5.44
November 19		5.3	5.23
December 1	518	5.3	5.20
January 1	5510	5.7	5.26
January 9		5.18	5.32
February 7	413.8	4.56	5 4
February 13		4:50	5.10
March 7	4 3,4	4.46	4.61
March 18	41610	4.59	5.9
April 21	41116	4:36	4.49
May 7		4.54	4.63
June 11		4.30	4:39
June 29		4:35	4.40
July 29		4.13	4.14
August 8		4:31	4.31
September 7		4.58	4:58
- · · ·	6.170	4.51	4:51
September 9	1474	4.57	4.57
September 10	470	4.50	4.50
Soptember 12		4.58	4.58

The fluctuations since the 7th inst, indicate the nervous condition of the market. The official quotation for middling is only $4\frac{7}{16}$ d.; but the grade is selling 4 15-16d. The opening, lowest, highest, closing and average prices of middling upland compare as follows:

890-91.	1889-90.	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.	1883-84.	1882-83.

The official quotation was never lower than 43/3d, but plenty of the sales are done at 45-16d.

The import into Europe during the past season (September estimated) compares as follows with the actual arrivals in the previous four seasons, in thousands of bales. The stocks and deliveries are added. The stock at the end of September is estimated at 1.10/0.00 below against 700-000 lest were estimated at 1,100,000-bales, against 709,000 last year.

The new season opens with lower prices than have been The new season opens with lower prices than have been witnessed, at the same date, for a generation past, and with stock little, if any, larger than at the end of September, 1833, when the rate of consumption for Europe was 137,000 bales of 400 lbs. per week, against the present date of 173,000 bales. In our letter of twelve months ago we stated that the world wanted an American crop of 7,500,000 bales, assuming full supplies to be received from other quarters; but although Egypt sent a bumper crop, there was a more than counteracting deposit in the shipments from India; and so far as we can estimate at present, the consumption of American cotton during the season ending on the 30th inst. will not fall short can estimate at present, the consumption of American cotton during the season ending on the 30th inst. will not fall short of 7.850,000 bales. In this connection it should be borne in mind that an estimate of 7.500,000 was of cotton equal in quality to that of last season, but it turned out at least 2 to 3 per cent worse; equal to about 200,000 bales. In the coming season there will be a further reduction in the shipments from India, as the crop is smaller, and is moreover, like the American crop deing hally but as the new American crop deing hally; but as the new American crop deing hally; but as the new American crop deing hally; but as the new American crop deing party of the state of the season that the season control deing hally; but as the new American crop deing party of the season control of the season control of the season crop deing party of the season control of the season contr can crop, doing badly; but as the new American crop promises to be better in quality than the last one, it may be that the consumption in 1891-92 will not exceed that of 1890-91, and that a yield of 7,250,000 would suffice to go around. But so serious a reduction in supply would mean a material advance upon present values, as the stocks in the world would once more be reduced to figures small enough in compass to attract more be reduced to figures small enough in compass to attract the attention of speculative operators able and willing to engineer a "corner." So far as the prospects of trade are concerned they are fairly good for this country, and for most places on this Continent—the chief exception being Russia, which country will probably take at least 100,000 bales less American than in the old season, owing to the distress caused by the semi-failure of the food crops. It is for this reason that we think it possible that not more cotton will be required in the new season than was used last season. As to prices, as already observed we look for some advance—great or small—according to the out-turn of this American crop. As to the probable extent of this crop, any estimate put forth thus early can only be mere gusss work, but private advices at hand this week do not justify expectation of more than 7½ to 7½ millions, while some consider these figures too large.

Yours obediently,

Yours obediently.

Gadden, Ala...\$40,000 court house, due 1921, are for sale.

Ohlo. & Miss'ssippi...At Cincinnati, Oct. 17, 1891, Jud ge

Ohio & Miss'ssippi.—At Cincinnati, Oct. 17, 1891, Judge Maxwell decided in favor of the Baltimore & Ohio party on the method of voting to adjourn. Their opponents had in Thursday's meeting secured an adjournment to Nov. 19 by a viva voce vote, and the Court held that not only the by-laws of the company provided that the vote should be by shares, but also that the drift of modern judicial decisions with regard to corrections is founded on the principal, that property is the also that the drift of modern judicial decisions with regard to corporations is founded on the principle that property is the foundation of their being, not persons, and that votes should be by the amount of property held by individuals and not by the number of persons holding it. Therefore the vote to adjourn was void. The majority stockhold-rs voting, by proxies, adjourned till the 16th and then to the 17th, when Mr. C. K. Lord, representing Brown, Shipley & Co. of London, voted 147,760 shares of stock in favor of Julius S. Walsh, D. Fahnesteels and S. Melion as directoraged when wors declared. tock and S. McKim as directors, and they were declared elected.

Pacific Mail.—A statement has been made that the Pacific Mail Steamship Company has decided to issue 6 per cent bonds to the amount of \$3,000.000 for new boats for its China service, provided it could get a good price for the bonds and could get the contract from the Government to carry the mails under the new postal law. The China service alone will be worth \$450,000 to the company if it gets the mail contract. The company will need three new steamers on this line. It has two steamers now building, which will be finished by March 1, and two others rebuilding, which will be finished by March 1, and two others rebuilding, which the mail contract. The compares now building, which will be finished by March 1, and two others rebuilding, which will be finished by March 1, and two others rebuilding, which will be finished by Mav 1.

Mr. J. B. Houston, the Vice-President of the company, was quoted as saying: "The company has not decided to issue any local bat may do so should contracts warrant it. We have

bonds, but may do so should contracts warrant it. We have not got the Government contract and no issue of bonds has

been ordered.

Pennsylvania State Bonds.—The Sinking Fund Commission have resolved that in view of the fact that moneys sufficient to redeem the maturing loans are in the State Treasury, the Treasurer shall apply the said moneys to the redemption of the \$3,028,000 of Penn-ylvania State 5 per cent bonds, which are reimbursable on February 1, 1892, paying the holders thereof the principal of said bonds together with interest thereon to the date named.

San Antonio & Aransas Pass.-In a report of the receivers San Autonio & Aransas Pass.—In a report of the receivers for the twelve months ending July 14, 1891, it is stated that circumstances did not admit of adequate expenditures for renewals during the past year. A necessity exists for the improvement of the track, and putting the line in good physical condition, thus conserving the best interests of all concerned in the present.

cal condition, thus conserving the best interests of all con-eerned in the property.

In June an order of Court authorized the completion of the unfinished line between Lexington and Lott stations, a distance of 53 miles. Bids were invited for this construction complete, and M. Kenedy being the lowest biddler was awarded the contract for \$300,000 payable in receivers' cer-tificates at par, bearing 6 per cent interest per annum. His contract called for completion of the work by September 25, 1891, but owing to a legal conflict and failure of M. Kenedy to complete the line as agreed upon, a great loss is entailed upon the property, and the receivers are pushing the work to completion.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Oct. 23, 1891.

More seasonable weather in all latitudes has given something of an impulse to such business as depends in a great degree upon the progress of seasons and on atmospheric conditions; but it cannot be said in general terms that trade is tions; but it cannot be said in general terms that trade is active. Among speculative incidents it may be mentioned that wheat has declined under the excessive movement of the new crop, and that cotton has partially recovered an early decline from some reduction in receipts and reports of killing frosts. A large export movement in oats was attended by rumors that Russia was about to prohibit the export of oats.
There have been storms of unusual violence at sea, delaying the ocean steamers and causing many disasters to shipping,

There have been stories of units at violence at sea, delaying the ocean steamers and causing many disasters to shipping, more or less serious.

Pork declined early in the week, and the lower prices led to better business, but the close is dull; quoted at \$9.75 a \$10 for old mess, \$10.25 a \$10.75 for new mess, \$10.50 a \$11 for extra prime and \$13.50 a \$14.50 for clear. Beef has been dull; extra mess, \$7.75 a \$8.25; packet, \$9.50 a \$19.50; family, \$10.48;12 per bbl.; extra India mess, \$17.50 \$20 per tierce. Beef hams steady at \$12.50 per bbl. Cut meats are dull, and prices in some cases are cheaper. Quotations: Pickled bellies, \$1/4 a \$1/40. Stearine is quiet and easier at 71/4 a 71/4c, in hhds. and tcs. Oleomargarine is lower at 63/4c. Butter is firmer but dull at 24 a 33c. for creamery. Cheese is lower and dull at \$1/4 a 93/6c. for State factory, full cream.

Lard on the spot has been rather inactive all the week, and closes quiet at 6.25c. for prime City, 6.63/4 a 6.65c. for prime Western, with refined for the Continent quoted at 6.80 a 7c.—prices which show a slight decline. The speculation in lard for future delivery has not been generally active, but at times there have been buying movements in sympathy with the rise in corn.

there have been buying movements in sympathy with the rise in corn. To-day there was some selling on Western account.

 an advance of 10@30 points for the week.

Raw sugars have been quiet until to-day, when there was a fair business, but at a decline from the nominal prices previrousing quoted, closing at 2 15-16c, for fair refining muscavado and 3 9-32c, for centrifugals, 96 deg. test. The sales to-day were 60,000 bags centrifugals, 96 deg. test, at 3 9-32c. Futures were firmer at 3 26 \(\alpha \) 3 30c, for December. Refined have been fairly active at lower prices, though at the close the market was steady at a slight recovery from bottom prices. Crushed is quoted at $5 \, a \, 5 \, \frac{1}{6} c$, and granulated at $4 \, 1 \, 16 \, a \, 4 \, \frac{1}{4} c$. At the tea sale on Wednesday the offerings were larger and prices

were easier.

Kentucky tobacco shows rather more life, and sales for the Kentucky tobacco shows rather more life, and sales for the week are 300 hhds., of which 200 hhds. for export. Seed leaf has been in steady request at full prices, and sales for the week are 2,400 cases. as follows: 600 cases 1890 crop, Pennsylvania Havana, $6.942 \frac{1}{2} c.$; 200 cases 1890 crop, Pennsylvania seed, $13 \frac{1}{2} c$ at 1890 crop, Pennsylvania seed, $13 \frac{1}{2} c$ at 180 crop, New England Havana, $13 \frac{1}{2} c$ at 6c.; 150 cases 1890 crop, New England Havana, $13 \frac{1}{2} c$ at 6c.; 100 cases 1890 crop, New England seed, $21 \frac{1}{2} c$ 35c.; 250 cases 1890 crop, Dutch, $12 \frac{1}{2} c$ 13c.; 150 cases 1890 crop, Ohio, $3 \frac{1}{2} c$ 10 $\frac{1}{2} c$; 150 cases 1890 crop, Zimmer's, $12 \frac{1}{2} 41 c$, and 150 cases sundries, 6 c 35c.; also 1,580 bales Havana, 70 c 15, and 150 bales Sumatra, \$185 $\frac{1}{2} 3$ 25.

On the Metal Exchange Straits tin is quiet and easier; ten tons sold to-day at 19.95c. for December; quoted at 20.05c. on the spot. Ingot copper has further declined, with more doing at the reduced prices. There were sales to-day of 75,000 lbs. of Lake at 11½c. for October and December. Domestic lead is again easier and dull at 4½c. Pig iron warrants are quoted at \$15.25 for January. The interior markets continue very dull, but a considerable sale of scrap steel is reported at about \$17 per terms.

\$17 per ton.

Refined petroleum is quoted at 6.40c. in bbls., 7.80c. in cases and 3.20c. in bulk; naphtha, 5.75c.; crude in bbls. 5.60c. and in bulk 3.10c. Crude certificates were active to-day, selling to the extent of 85,000 bbls. at 59% 6.0%c., closing at 60%c. These prices show a partial decline from last week. Spirits turpentine is easier and quiet at 36% 4.037%c. Rosins are quiet and unchanged at \$1.30@\$1.37% for strained. Wool has a slow sale, but hops are in better demand.

COTTON.

FRIDAY, P. M., October 23, 1891,

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 380.121 bales, against 375,820 bales last week and 299.364 bales the previous week, making the total receipts since the 1st of Sept., 1891 1,793,893 bales, against 1,754.279 bales for the same period of 1590, showing an increase since Sept. 1, 1891, of 38,614 bales.

seen that the interior receipts fell below estimates. Cotton on the spot declined 1-16c. on Saturday and Monday and recovered ½c. on Wednesday. The market to-day was dull at 87-16c. for middling uplands.

The total sales for forward delivery for the week are 833,400 bales. For immediate delivery the total sales foot up this week 1,032 bales, including — for export, 1,032 for consumption,—for speculation, and — in transit. Of the above — bales were to arrive. The following are the official quotations for each day of the past week—October 17 to October 23.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Oct. 23), we add the item of exports from the United States, including in it the exports of Friday only.

Market.

18,000 bales.

The above figures indicate an *increase* in the cotton in sight tonight of 733,214 bales as compared with the same date of 1890, an *increase* of 992,958 bales as compared with the corresponding date of 1889 and an *increase* of 1,329,009 bales as compared with 1888.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week, and since September 1, the shipments for the week and the stocks to-night, and the same items for the corresponding period of 1890—is set out in detail in the following statement.

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

	reek	Receip	ts at the	Ports.	St'k at	Interior	Towns.	Rec'pts from Plant'ns.			
Ending-		1889.	1890.	1891.	1889.	1890.	1891.	1889.	1890,	1891.	
Sept.	18	136,348	171,709	159,055	31,195	40,396	85,160	141,937	183,603	177,685	
	25	191,833	211,522	216,386	46,836	63,353	108,211	207,504	234,479	239,437	
Oct.	2	245,374	246,938	230,986	87,712	87,879	142,248	286,250	271,464	265,001	
6.6	9	273,609	296,119	299,361	124,545	107,825	191,133	310,412	316,165	348,251	
**	16	304,501	311,313	375,820	156,925	148,672	258,127	336,881	332,060	442,814	
41	23	320,578	313,451	380,121	178,018	194,967	310,863	341,666	359,746	432 857	

The above statement shows: 1.—That the total receipts from the plantations since September 1, 1891, are 2,047,827 bales; in 1890 were 1,934,676 bales; in 1899 were 1,789,315 bales.

2.—That, although the receipts at the outports the past week

were 380,121 bales, the actual movement from plantations was 432,857 bales, the balance going to increase the stocks at the interior towns. Last year the receipts from the plantations for the same week were 359,746 bales and for 1889 they were 341,666 bales.

Overland Movement for the Week and since Sept. 1.—We give below a statement showing the overland movement for the week and since September 1. As the returns reach us by telegraph late Friday night it is impossible to enter so largely into detail as in our regular meathly report, but all the principal matters of interest are given. This weekly publication is of course supplementary to the more extended monthly statements. The results for the week ending Oct. 23 and since Sept. 1 in the last two years are as follows:

	18	391.	1890.			
October 23.	Week.	Since Sept. 1.	Week.	Since Sept. 1.		
Shipped-						
Via St. Louis	24,737	72,747	13,677	38,984		
Via Cairo	18,827	44,771	9.839	35,182		
Via Hannibal	12,217	31,543	3,223	14,796		
Via Evansville	707	848	302	969		
Via Louisville	9.042	23,729	3,599	13,366		
Via Cincinnati	5.963	20.538	4,345	15,441		
Via other routes, &c	7,655	31,116	8,565	31,514		
Total gross overland Deduct shipments—	79,148	225,342	43,550	150,252		
Overland to N. Y., Boston, &c.,	2.979	16,908	2.220	8.494		
Between interior towns	3.515	9,912	2,236	9,954		
Inland, &c., from South	3,839	23,396	2,174	17,533		
Total to be deducted	10.332	50,116	6,730	35,981		
Leaving total net overland*	68,816	175,226	36,820	114,271		

Including movement by rail to Canada.

The foregoing shows that the week's net overland movement this year has been 65,816 bales, against 36,830 bales for the same week in 1890, and that for the season to date the aggregate net overland exhibits an increase over a year ago of 60,955 bales.

In Sight and Spinners'	1	891.	1	1890.			
Takings.	Week.	Since Sept. 1.	Week.	Since Sept. 1.			
Receipts at ports to Oct. 23 Net overland to Oct. 23 Southern consumption to Oct. 23.	68,816	175,2 6	36,×20				
Total marketed	461,937 52,736			1,955,550 180,397			
Came into sight during week. Total in sight Oct. 23	514,673	2,319,033	408,566	2,135,947			
North'n spinners tak'gs to Oct. 23		355,389		324,693			

It will be seen by the above that there has come into sight during the week 514,673 bales, against 408,586 bales for the same week of 1890, and that the increase in a mount in sight to-night as compared with last year is 183,106 bales.

WEATHER REPORTS BY TELEGRAPH.-Reports to us by telegraph this evening indicate that the temperature has been lower as a rule during the week, with frost at a number of points and in some cases killing frost. Otherwise the weather has been favorable, and the gathering and marketing of the crop has progressed rapidly.

Galveston, Texas .- It has rained lightly on one day of the week, the rainfall reaching ten hundredths of an inch. The thermometer has averaged 70, the highest being 79 and the

Palestine, Texas.-The weather has been dry all the week and picking has progressed finely. The thermometer has averaged 63, ranging from 44 to 82.

Huntsville, Texas.-There has been no rain all the week, and the work of gathering the crop has been actively prosecuted. The thermometer has ranged from 40 to 80, averaging 60.

Dallas, Texas.-Picking is progressing actively, no rain having fallen during the week. Average thermometer 64, highest 86 and lowest 42.

Luling, Texas.-Dry weather has prevailed all the week and picking is going on rapidly. The thermometer has averaged 69, the highest being 96 and the lowest 42.

San Antonio, Texas,-There has been rain on one day during the week, the precipitation being nineteen hundredths of an inch. The thermometer has averaged 67, ranging from 46 to 88.

Columbia, Texas,-Picking is active. We have had no rain all the week. The thermometer has ranged from 42 to 82,

Cuero, Texas.-Dry weather has prevailed all the week and picking has made excellent progress. Average thermometer 66, highest 84 and lowest 48.

Brenham, Texas.-We have had dry weather all the week and picking is active. The thermometer has averaged 63, the highest being 82 and the lowest 44.

Belton, Texas.-There has been no rain all the week and picking is active. The thermometer has averaged 63, ranging from 38 to 88.

Weatherford, Texas.-The weather has been favorable, and picking has progressed finely. The thermometer has ranged from 42 to 84, averaging 68.

New Orleans, Louisiana. - There has been no rain all the week. Average thermometer 65.

Shreveport, Louisiana. - We have had excellent harvest weather the past week. Rainfall eighteen hundredths of an inch, on one day. The thermometer has averaged 62, the high est being 82 and the lowest 38.

Columbus, Mississippi.-The picking season has been exceptionally good and but little cotton is left in the fields. There has beeen no rain during the week. The thermometer has averaged 63, ranging from 45 to 80.

Leland, Mississippi.-Telegram not received.

Clarksdale, Mississippi.-Three killing frosts, the temperature 32, being followed by dry, clear weather, have been a benefit instead of damage to cotton. The crop is fully halfhoused, and will be short. There have been only two showers since picking began.

Meridian, Mississippi.—Cotton picking is about completed, very little being left to gather. .

Little Rock, Arkansas.-There has been but a trace of rain the past week. The weather continues dry and cool and cotton is moving freely, yet not as much so as before the decline in prices. The thermometer has averaged 59, the highest be ing 81 and the lowest 39.

Helena, Arkansas.- Cotton is being rapidly picked and marketed. Receipts are nearly double those of last year but still the crop will be short. The weather has been fine during the week, there having been but thirteen hundredths of an inch of rainfall, on one day. Heavy frost this morning. The thermometer has averaged 56.7, ranging from 36 to 78.

Memphis, Tennessee.-This week's receipts are the largest on record. There has been light rain on one day of the week, to the extent of ten hundredths of an inch. Picking is making good progress and marketing is unprecedented. Killing frost this morning general throughout the Memphis district, but no material harm done. The thermometer has ranged from 41 to 77, averaging 59.

Mashville, Tennessee.-There has been rain on one day of the week, the precipitation reaching twenty-nine hundredths of an inch. Average thermometer 54, highest 76, lewest 36.

Mobile, Alabama.-Killing frost was generally reported throughout the interior on Tuesday. Picking is active and nearing completion in many sections. The weather has been clear all the week. The thermometer has averaged 62 the highest being 79 and the lowest 42.

Montgomery, Alabama. There has been no rain all the week, and none hardly during this present unprecedentedly favorable picking season. We have had light frost on each of the past three nights. The water courses are low and rain is needed. The thermometer has averaged 60, ranging from 40 to 79.

Selma, Alabama,—It has been clear all the week. The thermometer has ranged from 38 to 80, averaging 59.

Aubwn, Alabama,—No telegram received.

Madison, Florida.—Telegram not received.

Son, Florida. — leiegian not received upons, Georgia.—There has been no rain during the The thermometer has averaged 61, ranging from 42 week.

Savannah. Georgia.-Dry weather has prevailed all the week. Taging 60. The thermometer has ranged from 45 to 73, aver-

Augusta, Georgia.—The weather has been clear and pleas ant with light rain on one day of the week, the rainfall reaching four-hundredths of an inch. There have been several light frosts. Cotton is coming in freely. Average thermometer 56, highest 73 and lowest 37.

Charleston, South Carolina.—We have had no rain during e week. The therm:ometer has averaged 61, the highest the week. 74 and the lowest 46.

being 74 and the lowest 46.

Stateburg, South Carolina.—There has been light rain on one night, the precipitation reaching three hundredths of an inch. Light frosts occurred on low grounds Sunday, Tuesday and Wednesday. The thermometer has averaged 54.6, ranginch. Light frosts oc and Wednesday. Th ing from 42 5 to 65 3.

Wilson, North Carolina.—There has been light frost, but no damage to cotton. We have had rain on two days of the week, the rainfall reaching twenty-four hundredths of an inch. The thermometer has ranged from 42 to 64, averaging

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 8 o'clock October 23, 1891, and October 23, 1890.

INDIA COTTON MOVEMENT FROM ALL PORTS,—The receipt⁸ and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to October 22.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

	Shipm	ents this	week.	Shipme	nls since	Receipts.		
Tear 6: Br 1891 1 1890 . 1889 2	Great Bril'n.	Conti- nent.	Total.	Great Britain	Conti- nent.	Total.	This Week.	Since Sept. 1.
		6,000	7,000		26,000 12,000	28.000 15,000	17,000	57,000 34,000
1889	2,000	3,000	5,000 4,000	6,000	20,000 $24,000$	30,000		29,00 0 22,0 00

According to the foregoing Bombay appears to show an increase compared with last year in the week's receipts of an increase compared with last year in the week's receipts of 11,000 bales and an increase in the shipments of 5,000 bales, and the shipments since Sept. 1 show an increase of 13,000 bales. The movement at Calcutta, Madras, and other India ports for the last reported week and since the 1st of September, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipme	nts for the	e week.	Shipm	Shipments since Sept. 1.						
	Great Britain.	Continent.	Total.	Great Britain.	Continent.	Total.					
Calcutta-					2.000	3,000					
1891		1,000	1,000	1,000	2,000						
1890	*****			1,000	2,000	3,000					
Madras-					7 000	13,000					
1891	*****		******	8,000	5,000	13,000					
1890	1,000		1,000	11,000	7,000	18,000					
All others-			-			01 000					
1891	1.000		1,000	14,000	7,000	21,000					
1890	2,000	*****	2,000	21,000	9,000	30,000					
Total all-											
1891	1.000	1.000	2,000	23,000	14,000	37,000					
1890	3,000	-,500	3,000	33,000	18,000	51,000					

The above totals for the week show that the movement from the ports other than Bombay is 1,000 bales less than the same week last year. For the whole of India, therefore, the total shipments since September 1, 1891, and for the corresponding periods of the two previous years, are as follows:

Shinmente	18	91,	18	90.	1889.		
Shipments to all Europe from—	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, October 22.	18	1891.		890.	1889.		
Receipts (cantars*) This week Since Sept. 1.		20,000 19,000		25,000 71,000	250,000 712,000		
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.	
Exports (bales)— To Liverpool To Continent	14,000 3,000	51,000 12,000	13,000 5,000		12,000	48,000 11,000	
Total Europe	17,000	63,000	18,000	78,000	16,000	59.000	

^{*} A cantar is 98 pounds.

This statement shows that the receipts for the week ending Oct. 22 were 220,000 cantars and the shipments to all Europe 17.000 bales.

MANCHESTER MARKET.—Our report received by cable to-night from Manchester states that the market is quiet for both yarns and shirtings. Spinners are considered to hold small stocks of cotton. We give the prices for to-day below, and leave those for previous weeks of this and last year for comparison:

				189	1.			1890.							
		32s Cop. 84 tbs. Twist. Shirtings.			Colt'n Mid. Uplds		s Cop.	84 lbs. Shirtings.			Mid. Uplds

The words "bad," "good" and "fair" following the years given above mean simply that the aggregate crop for the year named was bad good or fair.

JUTE BUTTS, BAGGING, &C.—There has been no special feature in the market for bagging the past week. The demand has been only moderate, the wants of Southern buyers having been pretty well satisfied. No changes in quotations are reported, the market closing at 5½c. for 1¾ lbs., 6c. for 2 lbs., and 6½c. for standard grades. Jute butts continue in limited request at 1½c. for paper grades and 2½c. for bagging quality.

THE EXPORTS OF COTTON from New York this week show an increase compared with last week, the total reaching 26,311 bales, against 24,053 bales last week. Below we give out usual table, showing the exports of cotton from New York, and the direction, for each of the last four weeks; also the total exports and direction since Sept. 1, 1891, and in the last column the total for the same period of the previous year.

WEATHER RECORD FOR SEPTEMBER.—Below we give the rainfall and thermometer record for the month of September and previous months of this year and the two preceding years.

The figures are from the records of the Signal Service Bureau, except at points where they have no station, and at those points they are from records kept by our own agents.

Total expe	ets of a	otton n	annfacti	TPOS.			1 942 778	1.945.855	

The foregoing shows that there has been exported from the United Kingdom during the twelve months 1,242,778,000 lbs. of manufactured cotton, against 1,245,855,000 lbs. last year, or a decrease of 3,077,000 lbs.

A further matter of interest is the destination of these exports, and we have therefore prepared the following statements, showing the amounts taken by the principal countries during September and since October 1 in each of the last three years:

EXPORTS OF PIECE GOODS AND YARNS TO PRINCIPAL COUNTRIES IN SEPTEMBER, AND FROM OCTOBER 1 TO SEPTEMBER 30.

EAST INDIA CROP.-The following is from the Bombay Prices Current of September 26:

**Rainfall, b. 6-90 c. 51 s. 6-8 s. 6

The official telegraphic reports made known yesterday advised but little change in the posision of the graving or p. Since the beginning of the week there had been a further considerable rainfall at Nagpore and Delhi, and in both districts the plants were suffering from too much moisture; but in other districts of the bours and Bengal circles there had been little or no morer-an, and not half an inch in any part of the Dhollera circle; and in this and the Comra circle the plants were flourishing, as they also were at Broach, in seasonable weather. No improvement was reported from Bellary or Huoli, where rain was still much needed.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT. COMPARATIVE POAT RECEIPTS AND DALLY CROP MOVEMENT.—A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The monthly movements since Sept. 1, 1891, and in previous years, have been as follows.

Monthly		Year	Beginning	septembe	r 1.	
Receipts.	1891.	1890.	1889.	1888.	1887.	1886.
Sept'mb'r	676,823	732,233	561,710	332,017	654,776	359,203
Perc'tage o		10.47	69.56	03.98	11.68	06.75

This statement shows that for the month of September the receipts at the ports this year were 55,413 bales less than in 1890 and 115,413 bales more than at the same time in 1889, By adding to the totals to Sept. 30 the daily receipts since that time we shall be able to reach an exact comparison of the movement for the different years.

Shipping News.—The exports of cotton from the United States the past week, as per latest mail returns, have reached 164,594 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph and published in the Chronicle last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

BREADSTUFFS.

FRIDAY, October 23, 1891,

The market for wheat flour has been dull. Holders refused to make the concessions that were necessary to lead to large transactions, and business was of that hand-to-mouth character which is exceedingly tentative in respect to values and not infrequently leads to complete demoralization. Rye flour and corn meal on the contrary were very firmly held, with transactions fully up to the average. To-day the tone of the market was steadier, but without activity in the deal-

Wheat has declined. There have been at times moderate speculations for the rise, based on the very bad weather in Great Bitain and the reports that the Imperial Government of Russia had prohibited, or was about to prohibit, the exportation of this or that cereal. But in each case the sp culation was short lived, and was followed by a decline exceeding the advance. The large movement and accumulating stocks of the new crop were elements of weakness there was no withstanding. To-day a renewal of the report that Russia will prohibit the exportation of all breadstuffs caused a partial recovery of values for both futures and spots, with buying of the former to cover contracts and of the latter for export to a moderate extent, chiefly No. 1 Northern spring at \$1 03@\$1 031/2, but including No. 2 red winter at \$1 02%@\$1 03 afloat; also No. 3 winter at 94c.

Indian corn has advanced. Supplies for current delivery and to arrive in the early future have been quite meager, and the repeated failure of promises and prospects in this regard have gradually forced the conviction that values for the new crop, large as it promises to be, had fallen too low. Hence, on Wednesday a large and resolute bull movement; and to-day the market showed a hardening tendency with an active speculation, but the regular trade was less active.

THE DRY GOODS TRADE.

NEW YORE, Friday P. M., October 23, 1891.

With a clear falling off in the demand for spring goods, the market has during the past week worn a more than ever pronounced between-seasons appearance. It has in fact been practically featureless. The demand for staple cottons has been confined to immediate requirements almost entirely, and although there are, as usual at this time of the year, inquiries for goods to ship by canal on spring dating, very little actual business of that character has resulted. The fall trade in prints, ginghams, &c., at first hands is naturally very small just now, and as buyers have in many instances placed their first orders for spring ginghams, &c., the demand for these has fallen off. The general position of the market is unaltered-at least on the surface-but at the same time it is not in some directions as steady as it looks. The most favorable feature just now is the regularity of collections in all parts of the country, the improvement lately noted in the South being well sustained. The jobbing trade continues quiet, an occasional "drive" relieving the monotony and showing the progress of the clearing-up progress by agents and commission houses.

DOMESTIC WOOLENS .- There is even less to report of this department than of cotton goods. The demand for both heavy and light woolen and worsted trouserings and suitings continues on a very restricted scale and without new feature, agents being chiefly occupied in charging up accounts, making deliveries on back orders, and watching the progress of the dispute between importers of worsteds and the Customs officials. As this dispute involves nearly \$1,0 0 000 worth of worsteds, and the final judgment must have an important bearing on future importations, the interest taken in it by domestic houses is easily understood. Of overcoatings, cloakings, &c., there is nothing new to report.

DOMESTIC COTTON GOODS,-The exports of cotton goods from this port for the week ending Oct. 20 were 2,199 oackages, valued at \$127,636, their destination being to the points specified in the table below:

NEW YORK TO OCT. 20.		1891.	11	1890.
Saw Tork To Oct. 20.	Week.	Since Jan. 1.	Week.	Since Jan. 1

				2,787
China, via Vancouver	2,199 409	187,564 23,301	4,122	109,069 54,300
Total	2.608	210,865	4,122	163,369

* From New England mill points direct.

The value of the New York exports since January 1 have b-en \$9,824,277 in 1891, against \$6,230,745 in 1890.

Business in leading lines of domestics has been strictly moderate. Socks of brown and bleached goods are still reported in generally fair shape, particularly in low grade goods in brown and bleached cottons wide sheetings, cotton flannels and colored cottons. Converters, shirt makers and cutters have placed some fair orders, but the jobbing and export demand has been slow. There are no quotable changes in prices, but "shad ng" in some places is still going on. White goods in low-priced makes are weak and slow of sale, Prints giughams, to indept styles were along also with write goods in 10w-priced makes are weak and slow of sale, Prints, ginghams, &c., in dark styles were slow also, with spring makes quieter than they have been since the opening of the season. Print cloths are quoted unchanged at 3c. for 64x64 at Fall River, with outside sellers at 2 15-16c. per yard. The stock last week was 183,000 pieces at Providence and 292,000 pieces at Fall River, in all 475,000 pieces. Last year's stocks for the corresponding date were disputed and the usual table of comparisons is omitted.

FORKION DAY GOODS —Business with the importers has been slow in nearly all bracches. The demand for Bedford cords in dress goods continues exceptionally good, and current imports find a mark-t as soon as landed. In men's wear worsteds a number of cancellations are reported, owing to the stens a number of cancellations are reported, owing to the delay in deliveries entailed by the dispute already referred to. Moderate importation orders are noted in silk fabrics for spring, especially printed styles. No change in prices of steple lines have been reported during the week, and the market, if dull, is steady.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending Oct. 22, 1891, and since Jan. 1, and the same facts or the corresponding periods of last year are as follows:
